Executive Assistant General Manager

Four or Five-star Hotel

San Francisco or Los Angeles, USA

Dear Assistant General Manager,

This is the first time for me to send a letter about our study to your hotel. I am the Doctor and Chairperson of Sports in Japan. It is my pleasure to introduce our academic homepage "**chairperson.jp**" which is visited from all over the world excluding China (?). For your information, I have informed about the "**Chairperson 20th Anniversary Treatise**" which is an unconventional style (not a full paper style) to the professors of the University of Tokyo in 2012, Harvard University in 2013, Oxford University in 2014 and Paris University in 2015 for the "**Doping-Backdoor Theory**," the general managers or assistant general managers of hundreds of four or five-star hotels around the world for the "**Chairperson Cocktail**" and the regular members of the Vienna Philharmonic Orchestra for "**My Way**" in (2010 and) 2016. "There are one and only theory and cocktail for universities and hotels in the 21st century."

In Japan, Waseda University, the sole first-class private university, does not use the entrance-examination broker and 70 ~ 80% of the undergraduate students have a brain. Dr. Kaoru Kamata, (former) President of Waseda University and his henchmen spoke ill of me at Waseda University, "We (Waseda) can't accept Dr. Shida's way of conducting his research. He promotes his research on the floor, not on the stage ..." behind my back on July 10, 2006. From a bitter (not sweet) view point, three-fourth of undergraduate students of Waseda University are strong and one-fourth of them are weak, like Keio University which is the third-class private university to use the entrance-examination broker. "Quarter Weak (*San-kyou, Ichi-jaku*)." The University of Tokyo is the best one among about ten first-class public universities which does not use the entrance-examination broker and 100% of the undergraduate students have a brain. Two professors of the University of Tokyo gave their historical and traditional 'Academic Harassment' to me at the University of Tokyo. They dropped their head abruptly towards me on March 14 and May 22, 2012. For your reference, Fukushima University and my old school, Mie University are near first-class public universities which do not use the entrance-examination broker and 90% of the undergraduate students have a brain.

東京大学
THE UNIVERSITY OF TOKYO

Assistant General Manager, it would be grateful if your hotel cocktail "**Chairperson**." No response will be needed. to the Board of Directors of the Japan Society for Medical

is interested in my research. And I am content that your hotel just gets to know our These serious situations for our study in the academic field in Japan had been reported Education on May 30, 2015. Please feel relieved, but a little.

Sincerely,
Yukihisa SHIDA (M.D., Ph.D., Mie University, Japan)
Doctor and Chairperson of Sports — the fastest pace in history
Member of the Roppongi Hills Club, Japan

Doctor ("最高峰 *Saikouhou* «highest-level»" medical leader) and Nurses ("中堅 *Chuken* «mid-level»" medical staff) in Japan

MIE
UNIVERSITY

I will take a business trip to San Francisco, Las Vegas and Los Angeles and stay at three highest-class hotels, Four Seasons Hotel San Francisco on July 28, Bellagio Hotel Las Vegas on July 29 and 30, and Ritz-Carlton Hotel Los Angeles on July 30, 2022. I am writing the academic paper "Chairperson 30th Anniversary Report and Afterword" this year. So "Reports and Afterword on Private Tokyo Medical University's Scandal, 'Illegal entrance examinations and inappropriate entrance practices in the 21st century'" has been uploaded on the academic homepage "chairperson.jp". It is the reports and afterword on the most famous and representative of a Japanese money-powered backdoor university, private Tokyo Medical University. On the other hand, sending the letter to the mass media around the world has been delayed because of the Russian-Ukrainian War in 2022. The annual salary of a nurse (mid-level medical staff) is about 5,000,000 yen (36,900 US\$) and the average annual salary of a lawyer is 8,000,000 yen (59,100 US \$) in Japan. In contrast, a hospital doctor's annual salary is about 15,000,000 yen (110,800 US \$). That is why many Japanese want to become a medical doctor (highest-level medical leader) even if the education expenses cost more than 60,000,000 yen (443,300 US \$) for a mediocre medical student at money-powered backdoor private universities like private Tokyo Medical University or private Teikyo University (Tokyo) in the 21st century. For example, nurses who graduated from national Mie University (80% of students are brilliant) or private Keio University (70 ~ 80% of students are brilliant) become a "中堅 *Chuken* «mid-level»" medical staff at hospitals or clinics and get annual salary of 5,000,000 yen (36,900 US\$) in Japan.
