November 1, 2026

To JCHO Chiba Hospital Affiliated Geriatric Health Services Facility (Chiba City, Chiba Prefecture, Japan),

June 24, 2026, marked the conclusion of my regular Wednesday part-time service, which spanned three years and three months from April 2023. Unlike the subdued departure from my former part-time internal medicine role at the Chiba Foundation for Health Promotion & Disease Prevention (Chiba City), I was deeply grateful for the wonderful send-off and the beautiful bouquet presented by so many of the staff. As someone who is neither a Chiba native nor a Chiba University graduate, and who does not reside in the prefecture, I am truly touched by your exceptional warmth.

Meanwhile, since April 2025, my full-time affiliation has been with a 91-bed long-term care hospital in Saitama City. However, as the sole physician from a national university and the only brilliant mind there, I find myself entirely out of place within the institution, particularly concerning my specialty in medical education and research. Consequently, there is a good possibility that my employment contract there may also conclude in the near future.

At my full-time hospital, there are five or more mediocre male physicians—including the hospital director and regular part-time doctors—who come from the private Tokyo Medical University. I routinely witness their vulgar and unsightly workplace behavior, such as suddenly letting their heads drop like chickens, alongside their use of childish, elementary-school-level language, "*chatte*," "*chatte*." Furthermore, they engage in unsanitary acts, such as piling trash like Mount Fuji on the desk of another doctor who is a graduate of private Dokkyo Medical University (Tochigi Prefecture) in the medical office (confirmed by the administrative staff) and leaving the trash bin lids wide open. It is also a daily occurrence to see them playing video games on their tablets and watching anime on their smartphones during daytime working hours.

[Reference: "Statement on September 1 and 20, 2018 (Mass Media, World)" and "Chairperson 30th Anniversary Report" on the academic website *chairperson.jp*]

These doctors from Tokyo Medical University not only practice the same elementary-school-level medicine at my hospital as they do at their own affiliated university hospital, but I have also witnessed them falsely accusing a physician who formerly worked at the hospital—a graduate of the national Tohoku University—of "misdiagnosis." From the standpoint of a national university graduate, this is an intolerable violation of professional ethics that cannot be overlooked.

Incidentally, in the past in Mie Prefecture, a significant issue arose when a staff physician from private Saitama Medical University and a private practitioner from private Juntendo University (Tokyo) interfered with the clinical practices of the attending physicians—a hospital director who graduated from public Nara Medical University (Nara Prefecture) and a private practitioner from national Mie University (Mie Prefecture), respectively. They caused a major problem as "private university doctors who make false accusations of misdiagnosis." This was a serious issue of interference concerning the attending physicians' medical record entries and their explanations to the patients.

Furthermore, within the hospital, doctors—including a female physician from the private Tokyo Women's Medical University—often speak while pointing their fingers, casually saying things like "*Soko* (bottom) or *Asoko* (bottom)," or "*Asoko-kara* (from the bottom)." On June 8, 2026, right in front of me in the medical office, a male doctor from Tokyo Medical University stretched his upper body with his hands raised toward the ceiling and lightly tapped his own head. It was exactly like a solo performance of a squirrel and an elementary schooler from the movie *Charlie and the Chocolate Factory*.

Moreover, on August 10, 2026, a full-time physician from private Osaka Medical College and a regular part-time doctor from private Tokyo Medical University laughed and chatted loudly for about 30 minutes right next to my desk in the medical office. I reported the following to the acting hospital administrator (as the chief administrator position is currently vacant).

Incidentally, due to the earthquake in Kumamoto Prefecture, Japan that occurred on July 28, 2026, the Japan Society of Ningen Dock and Preventive Medical Care scaled back its conference schedule in late August, which unfortunately led me to forego my participation this time. Nevertheless, even from the common-sense perspective of a professor at the national Kumamoto University, the physicians from private medical universities at my full-time hospital in Saitama City would undoubtedly be judged as practicing elementary-school-level medicine. I believe that a professor at Kumamoto University would reach a similar assessment.

“Their daytime shifts consist of playing video games and watching anime and TV programs. Just like the hospital director from private Tokyo Medical University, they use childish language like ‘*chatte*,’ ‘*chatte*’ and engage in loud, foolish chatter based on their elementary-school-level work ethic, which is negatively affecting my clinical practice and research. For instance, I plan to discuss complex academic matters, seek advice, and exchange professional views with the president and professors of national Kumamoto University at the Japan Society of Ningen Dock and Preventive Medical Care conference in Kumamoto City on September 4 and 5.

For those of us from national universities, a doctor’s ‘work’ inherently means study and research. As an M.D., Ph.D. who graduated from Mie University in 1992, if they were my junior alumni, I would directly reprimand them by saying, ‘Do not talk loudly about such foolish nonsense.’ However, since they are doctors from (mediocre universities) private Osaka Medical College and private Tokyo Medical University, doing so would only cause trouble, so I refrain from doing so.”

Regarding the presidential lecture at Kumamoto Castle Hall (Main Hall capacity: 2,300), where I had planned a Q&A session with the President of national Kumamoto University, the conference secretariat informed me that “it is undecided whether a Q&A session will be held.” Furthermore, following the Kumamoto earthquake on July 28, it was announced in late August that the conference reception—where I was scheduled to converse with Kumamoto University professors—had been canceled.

Consequently, I canceled my attendance at the Annual Scientific Meeting of the Japan Society of Ningen Dock and Preventive Medical Care, which was scheduled from Friday, September 4 to Sunday, September 6, 2026. Instead, on those same dates, I traveled to Incheon, South Korea, to participate in one of Asia’s largest music festivals, the “Sound Planet Festival 2026” (held at Paradise City with 35,000 attendees), where I enjoyed the live performances and attended the midnight after-party at a nightclub.

[Reference: “Paper on November 22, 2014 (Korea)” and “Paper on November 1, 2021 (Japan),” “Paper on October 3, 2025 (Indonesia)” and “Paper on March 26, 2026 (Four Seasons Hotel Tokyo)” on the academic website *chairperson.jp*]

Now, I would like to address the management of JCHO Chiba Hospital and its Affiliated Geriatric Health Services Facility by Dr. Shinichi OKAZUMI, the Hospital Director and Facility Director, who is a former professor of surgery at private Toho University (Chiba Prefecture).

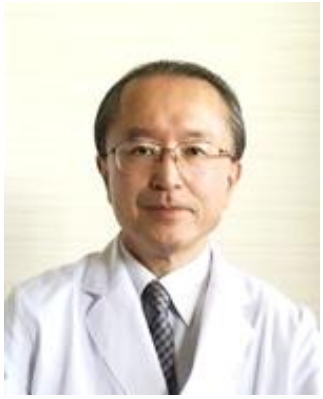

Because JCHO hospitals and their affiliated geriatric facilities operate under regulations akin to those of civil servants, even as an expert in medical education, I refrain from publishing the kind of detailed case reports and discussion I might for a private hospital. However, as everyone experiences on a daily basis, JCHO Chiba Hospital and its affiliated geriatric facility have routinely become a stage for elementary-school-level medical practice, characterized by infantile language like "*chatte*," "*chatte*," much like a third-rate private university. Notably, after a head nurse was transferred from the Cardiology Department (led by the hospital's Deputy Director) in April 2025, the geriatric facility descended into the exact same atmosphere as the Cardiology Department.

Consequently, on June 3, 2026, I directly pointed this out to Director Okazumi in my resignation email. Yet, reflective of the medical education standards of a private institution, he completely failed to provide any response or take any corrective action, much like the issue of the high cost of medical education at private Toho University.

JCHO Chiba Hospital (160 beds, Chiba City) and Affiliated Geriatric Health Services Facility (100 beds)
Located just behind and adjacent to JCHO Chiba Hospital is its Affiliated Geriatric Health Services Facility.

Dr. Shinichi OKAZUMI: Former Professor of Surgery at private Toho University (Chiba Prefecture), Hospital Director of JCHO Chiba Hospital, and Facility Director of the Affiliated Geriatric Health Services Facility.

Furthermore, as is widely known nationwide, the Hospital Director of the Chiba Cancer Center largely ignored the operating room issues raised within the hospital by a full-time female anesthesiologist in 2010 until the matter escalated into a lawsuit in 2012. Ever since that time, elementary-school-level medical practices—typified by infantile expressions such as "*chatte*," "*chatte*" used by the then-Chief of Internal Medicine (a laparoscopic specialist) at the Chiba Cancer Center—have been routinely witnessed. I regard this as a difficult problem that even the Japan Society for Medical Education has been unable to resolve by pooling its collective expertise, despite my presentation of the case study in 2015, 2025, and 2026.

[Reference: "Paper on April 27, 2015 (Australia)," "Paper on May 30, 2015 (Japan Society for Medical Education)," "Paper on September 17, 2025 (Japan Society for Medical Education)" and "Paper on July 31, 2026 (Japan Society for Medical Education)" on the academic website *chairperson.jp*]

Chiba Cancer Center (450 beds, Chiba City)

Dr. Atsushi KATO: Former Professor of Surgery at private International University of Health and Welfare (Chiba Prefecture) and Hospital Director of Chiba Cancer Center

Indeed, the Mie Chuo Medical Center (440 beds, Tsu City, Mie Prefecture) asserts on its website: “Realizing the dignity of life, we provide safe, high-quality medical care from the patient’s perspective. Keeping our hospital’s philosophy in our hearts, we always stand by our patients and take every possible measure to ensure they receive medical care with peace of mind.” However, regarding the elementary-school-level, lackadaisical medical practices exhibited by a respiratory specialist formerly from private Juntendo University Hospital (Tokyo), the organization’s corrective functions appear to be virtually non-existent, much like at JCHO Chiba Hospital and the Chiba Cancer Center. Similarly, at my previous full-time workplace, Seikokai Hospital (Chiba Prefecture), there is a stark discrepancy between their daily clinical reality and their website’s claim of “providing safe, high-quality medical care from the patient’s perspective, realizing the dignity of life.”

[Reference: “Paper on September 25, 2018 (Asahi Shimbun Company, Japan),” “Paper on October 1, 2019 (China),” “Paper on October 5, 2022 (Japan Hotel Association)” and “Paper on March 31, 2025 (Japan)” on the academic website *chairperson.jp*]

Finally, I would like to reiterate my deepest gratitude to Dr. Shinichi OKAZUMI and all the staff at the JCHO Chiba Hospital Affiliated Geriatric Health Services Facility for your immense support. Should we ever have the opportunity to work together again at another medical institution in the future, I look forward to our continued association.

At the Lobby (39F) of the Four Seasons Hotel Tokyo at Otemachi, on June 24, 2026

As a Spa & Wellness member at the Four Seasons Hotel Tokyo at Otemachi—an exclusive gathering place for elites meeting the Japanese ultra-high-net-worth standard of at least 500 million JPY, or the international very-high-net-worth standard of at least 5 million USD or higher standards—I visit the facility three to four days a week. Both members and guests receive world-class hospitality befitting the upper class worldwide, creating a refined environment where the hotel staff occasionally commend us with the word “Perfect.”

2026 年 11 月 1 日

JCHO 千葉病院附属介護老人保健施設御中

2023 年 4 月より 3 年 3 か月続きました JCHO 千葉病院附属介護老人保健施設（千葉市）の毎週水曜日定期非常勤、最終勤務日の 2026 年 6 月 24 日は、昔のちば県民保健予防財団（千葉市）の非常勤内科勤務時の静かな退職とは対照的に、大勢の職員の皆さんのお見送りと、美しい花束をいただきまして有難うございました。千葉県出身でなく、千葉大学卒業生でなく、千葉県在住でもない私にとりまして、真に過分な温かいお気持ちを賜りました。

一方私 2025 年 4 月からの常勤病院は、さいたま市の療養型病院（91 床）ですが、現在唯一の国立大学医師そして唯一の秀才として、私の専門、医学教育に関する研究、教育を含め病院内で完全に浮いていますため、こちらも近い将来雇用契約が終了してしまう可能性十分です。

常勤病院は病院長、定期非常勤医師として、私立東京医大から 5 人以上の凡才男性医師がみえてまして、これまで頭をガクッと落とす 鶏の様な下品で醜い勤務態度、「ちゃって」「ちゃって」と小学生の様な話言葉、医局内他の医師（私立獨協医大卒業生）の机の上に富士山の様にゴミを置いたり（事務方確認済)、医局ゴミ箱の蓋を開けっ放しにする不潔行為、昼間勤務時間中の Tablet を開いての TV Game 並びに Smart Phone でのアニメ鑑賞など日常拝見しています。東京医大の先生方は、私の常勤病院で東京医大附属病院と同じ小学生 Level の医療を行ってみえます上、以前勤務してみえた国立東北大学ご出身の医師への「誤診呼ばわり」も拝見してまして、こちらも国立大学からしますと看過出来ない Rule 違反です。

ちなみに、昔三重県では、私立埼玉医大ご出身医師（勤務医）並びに私立順天堂大学ご出身医師（開業医）が、それぞれ奈良県立医大ご出身医師（病院長)、三重大学出身医師（開業医）の主治医としての臨床に介入され、「誤診呼ばわりする私立大学の医師」として、問題になりました。主治医の医師診療録への記載、患者さんへの説明における介入の問題です。

また私立東京女子医大ご出身の女性医師なども含め、病院内で、時に指を指しながら「そこ」「あそこ」「あそこから」とよく話してみえまして、2026 年 6 月 8 日には医局内私の目の前で、東京医大の男性医師が天井に向けて手を挙げて上半身を伸ばし、自身の頭を軽く叩く姿も披露されました。映画「Charlie と Chocolate 工場」でのリスと小学生の自演のご様子でした。

さらに、2026 年 8 月 10 日には、私立大阪医大ご出身常勤医師と東京医大の定期非常勤医師が、医局内私のすぐ隣の席で大きな声で 30 分程笑い話をしてみえまして、下記を病院事務長代理（事務長 Post は空席）にお伝えしておきました。なお 7 月 28 日に発生しました熊本大地震によりまして、8 月下旬に日本人間 Dock・予防医療学会が学会日程を一部自粛されましたため今回参加お見送りとなってしまいましたが、国立熊本大学の教授から見ても、常識的にさいたま市の常勤病院での私立医大の先生方は、まず小学生 Level の医療と判断され、その点からは Double Check になっています。

「TV Game、アニメ、TV 番組を見ながらの日勤勤務で、東京医大の病院長と同じく『ちゃって』『ちゃって』と、小学生 Level の勤務を Base にした笑い話で、私の臨床、仕事に影響しています。例えば 9 月 4 日、5 日開催日本人間 Dock・予防医療学会（熊本市）にて、熊本大学の学長、教授などとお話ししますのは、学会でのお知恵拝借、意見交換など、学会 Level の難しい話で、私達国立大学では、医師の仕事は勉強、研究のことを指します。私は 1992 年に三重大学を卒業した医学博士で、私の後輩であれば『大きな声で、バカ話をするな』とお二人に直接注意するのですが、（凡才大学の）大阪医大と東京医大の先生方では Trouble になりますので出来ません。」

なお、熊本大学学長との質疑を予定していました熊本城 Hall（Main Hall 2,300 名収容）での学長講演につきましては、学会運営事務局から「質疑応答がなされるかどうかは未定です」とのご回答があり、さらに 7 月 28 日に発生しました熊本地震の影響で、熊本大学教授とお話しする日程でありました学会懇親会の中止が 8 月下旬に Announce されましたため、9 月 4 日（金）～6 日（日）開催 日本人間 Dock・予防医療学会（熊本市）出席は中止となりました。その代わりに私、同日は Asia 最大級の音楽祭「Sound Planet Festival 2026」（韓国仁川市、Paradise City、観客 35,000 人）に参加して Live を鑑賞し、Night Club での Midnight After Party に出席してきました。

そして、JCHO 千葉病院・病院長 兼 附属介護老人保健施設・施設長、私立東邦大学の元外科教授でみえます岡住慎一先生の病院並びに介護老人保健施設運営につきましてです。

JCHO 病院並びに附属介護老人保健施設は公務員に準ずる勤務規定のため、私医学教育の専門家でありましても、民間病院の様な詳細な Case Report 及び考察は控えますが、皆さんが毎日経験していらっしゃいます通り、日常 JCHO 千葉病院及び附属老健でも、三流私立大学と同様「ちゃって」「ちゃって」などの小学生 Level の医療、実践の場となっています。特に 2025 年 4 月に JCHO 千葉病院循環器内科から看護師長が異動になった後、老健も循環器内科（病院副院長が責任者）と同じ様な空気になってしまいました。ゆえに このことを 2026 年 6 月 3 日、私から退職願いの Mail にて、直接岡住病院長兼施設長に指摘させていただいたのですが、私立大学の医学教育 Level でみえまして、私立東邦大学の高額な医学教育費と同様、やはり全くご対応、お答えいただけませんでした。

なお全国的に知られています通り、千葉県がんセンター・病院長も、麻酔科常勤女性医師が 2010 年病院内で指摘しました手術室の問題を、2012 年に裁判に発展するまで ほぼ無視されてました。当時から、千葉県がんセンター・内科医長（腹腔鏡専門医）による「ちゃって」「ちゃって」などの小学生 Level の医療が恒常的にみられてまして、2015 年、2025 年そして 2026 年現在の日本医学教育学会におきましても、私からの Case Study 提示に対して、良い知恵を出し合い、解決策を見出すことが出来ない、難しい問題であると認識しています。

実際「いのちの尊さを自覚し、病む人の身になって安心で質の高い医療を行います。私たちは当院の理念を胸に、常に患者さんに寄り添い、安心して医療を受けていただけるよう万全を期しています」と website で主張されてます国立三重中央医療センター（440 床、三重県津市）も、元 順天堂大学病院の呼吸器内科専門医による、小学生 Level の緊張感のない医療に関して、JCHO 千葉病院及び千葉県がんセンターと同じく、組織の是正機能がほぼ機能してみえず、私の前 常勤勤務病院、聖光会病院（千葉県）も、website での主張「いのちの尊さを自覚し、病む人の身になる安心で質の高い医療」と日々の臨床は落差があります。

最後に改めまして、JCHO 千葉病院附属介護老人保健施設、岡住慎一先生以下皆様には、大変お世話になり有難うございました。またどちらかの医療機関でご一緒させていただく機会がありましたら、その際もどうぞよろしくお願い申し上げます。

志田幸久（東京都）
国立三重大学医学博士
