Cocktail "Chairperson"

Dear Mr. Stray,

I stayed at the Capella Hotel Singapore on October 20, 2024. I appreciate your kindness in allowing me to stay at the Capella Hotel Singapore and to give a comment to you, as I did at Osaka University, on October 21, 2024.

Mr. Stray : General Manager of the Capella Hotel Singapore (October 21, 2024)

Dr. Shida provides an explanation to Mr. Stray

At the National University of Singapore (NUS), from 1979 to 2002, women were limited to one-third of the admissions slots to the medical school because of remarks by ministers suggesting that "it is difficult for women to become good doctors because, besides night duties at the hospital, they also have to be wives and mothers." In Japan, in the 20th century, Private Aichi Medical University, and in the 21st century, Private Tokyo Medical University, both private institutions, became notorious for allowing admissions through underhanded financial deals. In 2024, it was confirmed that Private Tokyo Women's Medical University, another private institution, had similarly allowed backdoor admissions, where students who offered a large amount of money received additional points, allowing them to pass the entrance exam unfairly, just like at Private Aichi Medical University and Private Tokyo Medical University.

Four universities as a famous irregularities in an entrance exam in Japan

Harvard University has academic partnerships not only with the National University of Singapore but also with Teikyo University, among above the four Japanese universities. **However, the more I hear directly or indirectly from doctors and others affiliated with private universities like private Aichi Medical University and private Teikyo University in Japan, the more I feel like I'm becoming less intelligent.** (Even on the morning of September 24, 2024, the loud voice “*Imawa* (now), *Imawa* (now)...,” “*Soko* (the bottom)...,” of the «former » doctor from Private Tokyo Women’s Medical University in the neighboring examination room could be heard in my «M.D. and Ph.D. from National Mie University» examination room throughout the half-day.) They seem to find it difficult to mention both the names of their own private universities and my university’s name, National Mie University, in daily conversation, and they cannot disclose the cost of medical education (the cost required to become a doctor), because many students and graduates of the private universities are mediocre, and they do not distinguish between the brilliant and the mediocre, or between national and private universities.

If former Prime Minister Yoshihide SUGA, TOYOTA Motor Corporation’s heir Daisuke TOYODA, former Minister and Diet Member Shinjiro KOIZUMI, the eldest son of former Prime Minister Junichiro KOIZUMI, and Taro KONO, the eldest son of former House of Representatives Speaker Yohei KONO, were to become doctors at Private Aichi Medical University or Private Tokyo Medical University despite having a deviation score below 50, a “medical education fee” of over 60 million yen would be necessary for them in Japan. This was similar to the case of a backdoor candidate, Takatoku SANO, whose father, Futoshi SANO, was the Director-General of the Higher Education Bureau at the Ministry of Education, Culture, Sports, Science and Technology at that time. [Reference: “Statement on September 1 and 20, 2018 (Mass Media, World)” and “Chairperson 30th Anniversary Report and Afterword” on the academic homepage “chairperson.jp”]

“They have a low intelligence level.”

“In 21st-century Japan, evidence-based medicine is recommended. Regrettably, there is no clear evidence that they have a Japanese deviation score above 50.”

「21世紀の日本では Evidence に基づいた医療が推奨されていますが、残念ながら 4名共に偏差値 50 以上の Evidence は持ってみえず、知的 Level は低い」

Mr. Yoshihide SUGA

Mr. Daisuke TOYODA

Mr. Shinjiro KOIZUMI

Mr. Taro KONO

It seems that many mass media outlets, both inside and outside Japan, are misunderstanding the essence of the admission scandal in Japanese private university medical schools. It is not merely about the restriction of female admissions, as was the case in the past at the National University of Singapore. The core issue in the corruption of private medical school admissions lies in the backdoor, money-based system, where applicants use brokers and pay over 60 million yen as total fees for medical education.

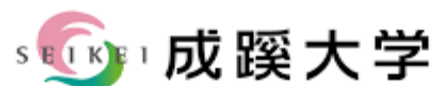

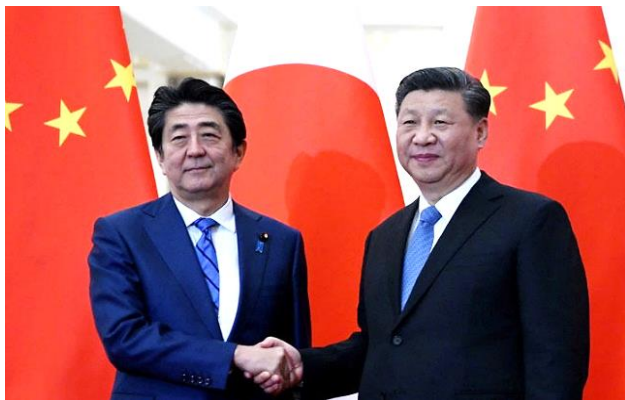

Unlike Singapore, the full extent of backdoor admissions at private universities in Japan remains unresolved. Additionally, the financial flow involving the secret accounts of the Okinaga family, who are related to the chairperson of the board of directors, in Liechtenstein has yet to be completely clarified. [Reference: “Paper on March 31, 2013 (Switzerland)” and “Paper on April 27, 2015 (Australia)” on the academic homepage “chairperson.jp”] Furthermore, although TIME magazine recently featured and interviewed (former) Prime Minister Kishida at the Prime Minister’s Residence, they failed to mention Shotaro KISHIDA, the Prime Minister’s secretary and eldest son, known as the “terrorist of the Prime Minister’s Residence,” or Masayoshi SHINTANI, the politician from Hiroshima Prefecture, who is close to Prime Minister Kishida and is believed to be involved in the backdoor money-based admissions scandal. [Reference: “Paper on March 25, 2024 (Italy)” and “Paper on July 6, 2024 (Mexico)” on the academic homepage “chairperson.jp”] Besides Private Teikyo University, other private universities such as Tokai University, Fujita Health University, and Kawasaki Medical School are also infamous in Japan as backdoor money-based universities with particularly high medical education fees. This includes mediocre students from affiliated high schools of Kawasaki Medical School, or a former graduate student from Fujita Health University, known for cheating on the national medical examination. **Their education fees for medical education are said to exceed 100 million yen or one million US dollars.**

TIME

“Big Money here”
「バカ高い、ここ」

Incidentally, the late former Prime Minister of Japan, ABE Shinzo, who graduated from Seikei University (Japan), and Chinese President XI Jinping, who graduated from Tsinghua University (China), show no clear evidence of brilliance. **Nevertheless, Mr. Abe, as Japan’s top leader and face, led Japan, while Dr. Xi, as China’s current top leader and face, is leading China, towards economic development in the 21st century.** The average stock market prices of both countries have also visibly increased, showing tangible results.

“They have a low intelligence level.”
(Late) Mr. ABE Shinzo and Dr. XI Jinping

“He has a low intelligence level.”

「彼は、知的レベルが低い」

President of Private Teikyo University
Yoshihito OKINAGA (Okinaga Family)

(Second from the right) Diet Member Masayoshi SHINTANI

As Parliamentary Secretary for Health, Labour and Welfare, Mr. Shintani attended the G7 Health Ministers' Meeting held on May 16th and 17th, 2019, in France. **Diet Member Shintani had a low intelligence level at private Teikyo University and is also now famous for being a “money-powered backdoor doctor.”**

President Yoshihiko OKINAGA said on Teikyo University's homepage, “Since its founding in 1966, the school philosophy has upheld “Practical learning,” “International perspectives,” and “Open mindedness” as its educational guidelines. However, President Okinaga and Diet Member Shintani have not disclosed any information regarding the name of the admission broker or the cost of medical education. The sources of slush funds in Liechtenstein have not been disclosed either.

General Manager, I had the opportunity to meet again with Mr. Shinya TASAKI, the best sommelier in the world (1995) and former president of the International Sommelier Association from 2010 to 2017, on August 19, 2024, after a long time. We had the following conversation.

Dr. Shida: Mr. Tasaki, it has been a long time.

Mr. Tasaki: I remember you, Doctor. We met several times at the Tokyo Dome Hotel.

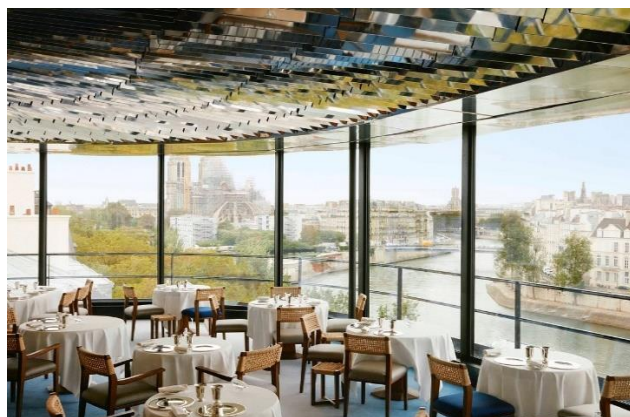

Dr. Shida: Allow me to reintroduce myself. I am conducting research on “Sports and Medical Education.” When the President of the World Federation for Medical Education (France), Dr. David Gordon, visited Kyoto in 2016, he commented, “I think maybe you are the only researcher who focuses on the backdoor.” May I ask you one question? Sommelier Nobuhide TANI (best sommelier in Japan in 2011) of the Hotel New Otani Tokyo mentioned that “If we can recognize Romanée-Conti in a blind tasting, we can become a world champion.” Mr. Tasaki, are you able to do so?

Mr. Tasaki: You mean Sommelier Tani from La Tour d’Argent Tokyo branch, right? I think I can. I’ve drunk Romanée-Conti quite often.

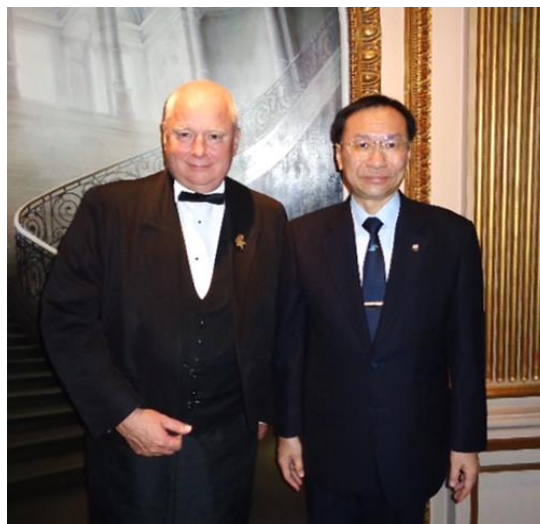

Dr. Shida: I believe the sommelier who has likely tasted Romanée-Conti the most is the sommelier at La Tour d’Argent Paris. I’ve met him before.

Mr. Tasaki: That would be Mr. David Ridgway. Yes, he’s number one when it comes to Romanée-Conti.

Dr. Shida: You can also identify Romanée-Conti in a blind tasting, proving once again that you are the world’s best sommelier. The former director (2019-2023) of the National University of Tokyo Hospital, Yasuyuki SETO, once mentioned on their homepage that “While the Cancer Center indeed has a large number of cancer case studies, the National University of Tokyo Hospital can comprehensively diagnose not just cancer, but various diseases as well.”

La Tour d’Argent Paris

**Mr. David Ridgway
on November 4, 2018**

**Mr. Shinya TASAKI
on August 19, 2024**

Additionally, on August 2, 2016, during the 24th Kyoto University Medical Education Interactive Seminar held in Kyoto City, I was subjected to academic harassment by Dr. Haruhiko KONISHI, who was then a professor at National Kyoto University, and other faculty members of Kyoto University before Dr. David Gordon’s lecture. [Reference: Paper on August 2, 2016 (World Federation for Medical Education) on the academic homepage “chairperson.jp”] Dr. Hiroshi NISHIKORI, who at that time was an associate professor at National Kyoto University (and formerly a lecturer at National University of Tokyo), was also present at the same small lecture venue. However, he turned a blind eye and a deaf ear to the academic harassment by Professor Konishi and other faculty members towards me. Subsequently, Professor Konishi was appointed as the president of the Japan Society for Medical Education, and Associate Professor NISHIKORI, after becoming the assistant president of the Japan Society for Medical Education and a professor at National Nagoya University, succeeded Professor KONISHI as the president of the Japan Society for Medical Education in 2024. [Reference: Paper on August 1, 2016 (World Federation for Medical Education) and Paper on August 2, 2016 (World Federation for Medical Education) on the academic homepage “chairperson.jp”]

Furthermore, I have indirectly informed the members of the Nobel Committee about the academic harassment at National Kyoto University through luxury hotels in Stockholm and the academic website “chairperson.jp,” requesting that they not condone or encourage academic harassment by the academic factions of National Kyoto University. Former president of the Japan Society for Medical Education, Haruhiko KONISHI, and current president, Hiroshi NISHIKORI, supported by academic factions from National Kyoto University, National Nagoya University, and the National University of Tokyo in their harassment against me, have essentially excluded both me and my academic homepage “chairperson.jp” from the Japan Society for Medical Education, creating a situation where those who commit such actions prevail. [Reference: “Paper on May 30, 2015 (Japan Society for Medical Education)” and “Paper on October 31, 2023 (Thailand)” on the academic homepage “chairperson.jp”]

“They have a high intelligence level, but they are dirty presidents.”
Former teachers of National Kyoto University

“The land in Kyoto City (together with Mie Prefecture) is barren.”

(Left) Present and (Right) Former President of the Japan Society for Medical Education

(Left) Dr. Hiroshi NISHIGORI
Professor of National Nagoya
University Medical Education Center

(Right) Dr. Haruhiko KONISHI
(Former) President of the Shizuoka
General Hospital

On August 8, 2024, Dr. Hiroshi NISHIGORI, the President of the Japan Society for Medical Education, stated in his message as the new president on the society's homepage, "I would like to work together with all of you to create a community that is warm to others, sharp in logic, uses words carefully, values reflection, treasures freedom and independence, occasionally fights against authority, shows tolerance, and actively works for better education." In fact, professors and faculty from the International Research Center for Medical Education at The University of Tokyo, along with Diet Member Masayoshi SHINTANI, exhibited gestures such as "suddenly dropping their heads like chickens." Similarly, professors and faculty from the Kyoto University Center for Medical Education and Internationalization are known for their "clumsy whistling and sighing." Furthermore, the medical education centers of The University of Tokyo, Kyoto University, and Nagoya University School of Medicine, with which past presidents have been affiliated, are leading the way in actively building the community of the Japan Society for Medical Education together with approximately 2,600 members, characterized by their academic harassment. [Reference: "Paper on January 22, 2013 (The University of Tokyo, Two universities in the U.S.A.)" and "Paper on May 30, 2015 (Japan Society for Medical Education)" on the academic homepage "chairperson.jp"]

On the other hand, in the Japanese TV drama "Black Pean (Black Pean Clamp)," a university professor running for president of the Japanese medical society stated, "It wouldn't make me happy to win the society president election in an unfair fight (I won't resort to dirty tactics in the election)." In contrast, in the real world, when Professor Shinya YAMANAKA of National Kyoto University received the Nobel Prize for his work on iPS cells in 2012, the president of National Kyoto University at the time commented at the press conference, "I was so happy I could cry." [Reference: "Paper on August 19, 2016 (Harvard Krokodiloes)" and "Paper on October 31, 2023 (Thailand)" on the academic homepage "chairperson.jp"]

Sincerely,

Yukihisa SHIDA, M.D., Ph.D.

シンガポール国立大学（NUS）では、1979年から2002年まで、「女性は病院での夜の業務以外に、妻であり母でもないといけないため、よい医師になることが難しい」と大臣が発言するなどして、医学部に入る女性を3分の1に制限してみえました。

日本では、20世紀に私立愛知医科大学、21世紀に私立東京医科大学が裏口金権大学として世界的に有名になり、今年2024年は、私立東京女子医大にて、寄付金を申し出た裏口受験生が加点されるなどで不正合格し、私立愛知医科大学、私立東京医科大学と同じく裏口入学していたことが確認されました。

実際、元総理大臣の菅義偉さんやTOYOTA自動車、創業者一族の御曹司、豊田大輔さん、そして小泉純一郎元総理大臣の長男小泉進次郎国会議員などが偏差値50未満の凡才として私立愛知医科大学、私立東京医科大学で医師になるためには、佐野貴徳受験生の父親佐野太（当時）文部科学省学術政策局長が私立東京医大への2017年裏口入試受験のために、入試 Broker 谷口浩二（当時）国会議員秘書を通じて（当時）白井正彦理事長に2016年に申し出た「6千万円以上の医学教育費」が必要になります。

日本国内外の多くの Mass Media が誤解してみえるのですが、日本の私立大学医学部の不正入試の本質は、シンガポール国立大学でも過去行われました女性の入学制限ではありません。「入試 Broker を使い、医学教育費として6千万円以上出す」裏口金権入試が、高額な医学教育費を伴う不正入試の本質です。

日本国政府、文部科学省、私立帝京大学、日本医学教育学会そして日本の Mass Media は、岸田文雄前総理に近い国会議員 新谷正義議員に関する「裏口金権医師、裏口金権大学と信ずるに足りる相当の理由、すなわち入試 Broker の存在並びに6千万円以上の医学教育費がある」ことについても沈黙を守ってみえまして、Singapore と異なり日本では、私立大学におけます裏口入試の全容が解明されていないのが現状です。過去指摘されました沖永理事長一族の Liechtenstein での隠し口座でのお金の流れも未だ詳細不明です。また、首相公邸で岸田文雄総理を Interview され特集されました週刊誌 TIME も、「首相公邸の Terrorist」として有名な長男岸田翔太郎 総理大臣秘書官、並びに岸田総理と同じ広島県ご出身で総理に近い政治家、裏口金権医師 新谷正義国会議員の事は触れてみえません。ちなみに私立帝京大学の他、私立東海大学、私立藤田医大、私立川崎医大なども、私立川崎医大附属高校からの凡才受験生、医師国家試験替え玉受験で有名な藤田医大大学院生などを含め日本では「特に高額な医学教育費の裏口金権大学」で、彼らの医学教育費は1億円以上、100万ドル以上にもなります。

General Manager、先月2024年8月19日に久しぶりにお会いしました世界最優秀 Sommelier（1995年）並びに 元国際 Sommelier 協会会長（2010-2017） 田崎信也さんと、以下お話する機会がありました。

志田医師：田崎さん、お久しぶりです。

田崎さん：先生、東京 Dome Hotel で何回かお会いしました。

志田医師：私改めて自己紹介させていただきますと、「Sports と医学の教育」の研究をしています。2016 年に World Federation for Medical Education (France) の President (Dr. David Gordon) が 2016 年に京都にいらした際は、「I think maybe you are the only researcher who focuses on the backdoor.」との Comment をいただきました。1 点お尋ねしてもよろしいでしょうか。Hotel New Otani 東京の谷宣英さん（2011 年日本最優秀 Sommelier）が「Romanée-Conti が Blind で分かれば世界 Champion になれます」と言われてましたが、田崎さんはお分かりになりますでしょうか。

田崎さん：La Tour d'Argent 東京の谷さんですね。私は多分分かります。Romanée-Conti はだいぶ飲んでますから。

志田医師：恐らく世界で最も飲まれていますのは、La Tour d'Argent Paris 本店の Sommelier さんです。以前お会いしたことがあります。

田崎さん：David Ridgway さんですね。Romanée-Conti は彼が 1 番です。

志田医師：田崎さんも Romanée-Conti が Blind でお分かりになりまして、さすが世界一の Sommelier さんです。瀬戸泰之（元）国立東京大学附属病院院長は以前、「がんセンターは確かに癌の症例（Case Study）数は多いが、国立東京大学附属病院は癌だけではなく、疾患を総合的に診ることが出来ます」と国立東京大学の Homepage 上おっしゃって見えました。

なお 2016 年 8 月 2 日に京都市で開催されました 24th Kyoto University Medical Education Interactive Seminar、Dr. David Gordon 講演会の際には、当時国立京都大学教授でみえた小西晴彦医師と京都大学教官から私 Academic Harassment を受けています。当時国立京都大学准教授でみえた錦織宏医師（元国立東京大学講師）も同じ小さな講演会場にみえましたが、小西晴彦教授並びに他の京都大学教官の私に対する Academic Harassment は見て見ぬふり、聞いて聞かぬふりをされました。その後小西晴彦教授は日本医学教育学会理事長に選出され、錦織宏准教授は日本医学教育学会理事長補佐並びに国立名古屋大学教授になられた後、小西教授の後を受け継いで本年 2024 年、日本医学教育学会会長になられています。

Nobel 賞委員会の皆様には Stockholm の高級 Hotel 及び学術 Homepage「chairperson.jp」等を通じて間接的に国立京都大学の Academic Harassment についてお伝えしてまして、国立京都大学学閥によります Academic Harassment を容認、助長されませんように依頼させていただいていますところですが、日本医学教育学会 小西晴彦 前理事長並びに錦織宏 現理事長が、国立京都大学、国立名古屋大学そして国立東京大学、それぞれの学閥によります私への Academic Harassment の Support を得て、日本医学教育学会から私と学術 Homepage「chairperson.jp」を実質排除してみえまして、やったもの勝ちの状況です。そして、この状況は今後も変わりなく続きそうです。

日本医学教育学会 錦織宏理事長は、学会 Homepage 上 2024 年 8 月 8 日に「他者にあたたかく、論理に鋭く、言葉を丁寧に使い、省察を重んじ、自由と独立を大事にし、時に権力と戦い、寛容であり、よい教育のために積極的に行動するコミュニティを、皆さんと一緒に作っていきたいと考えています。」と学会新理事長として挨拶を述べてみえまして、確かに国立東京大学 医学教育国際研究センターの教授、教官や新谷正義国会議員がお見せになる「鶏の様に頭をガクッと落とす下品な仕草」、国立京都大学 医学教育・国際化推進センターの教授、教官がお聞かせになる「下手な口笛と溜息」など、歴代の理事長が所属する東京大学、京都大学、そして名古屋大学総合医学教育センターが先頭に立って積極的に行動するコミュニティ、日本医学教育学会を約 2600 名の学会員皆さんと一緒に作っていらっしゃいます。

一方日本の TV ドラマ「ブラックペアン」では、日本の医学学会の会長候補である大学教授が「学会会長選挙で、アンフェアな戦いに勝っても嬉しくないからね（私は、学会の会長選挙で汚い真似はしない）」と述べてみえましたが、現実社会の国立京都大学総長は、2012 年に山中伸弥 京都大学教授が iPS 細胞でノーベル賞を受賞された際、「涙が出る程嬉しい」と記者会見で感想を述べられてました。
