Producer  
TV program; Today's Close-up plus  
NHK (Japan Broadcasting Corporation)  
Tokyo, Japan

Dear Producer,

This is the first time for me to send a letter about our study to your TV corporation. I am the Doctor and Chairperson of Sports in Japan. It is my pleasure to introduce our academic homepage "**chairperson.jp**" which is visited from all over the world including China (??). For your information, I have informed about the "**Chairperson 20th Anniversary Treatise**" which is an unconventional style (not a full paper style) to the professors of the University of Tokyo in 2012, Harvard University in 2013, Oxford University in 2014 and Paris University in 2015 for the "**Doping-Backdoor Theory**," the general managers or assistant general managers of hundreds of four or five-star hotels around the world for the "**Chairperson Cocktail**" and the regular members of the Vienna Philharmonic Orchestra for "**My Way**" in (2010 and) 2016. "There are one and only theory and cocktail for universities and hotels in the 21st century."

In Japan, Waseda University, the sole first-class private university, does not use the entrance-examination broker and 70 ~ 80% of the undergraduate students have a brain. Dr. Kaoru Kamata, present President of Waseda University and his henchmen spoke ill of me at Waseda University, "We (Waseda) can't accept Dr. Shida's way of conducting his research. He promotes his research on the floor, not on the stage ..." behind my back on July 10, 2006. From a bitter (not sweet) view point, three-fourth of undergraduate students of Waseda University are strong and one-fourth of them are weak, like Keio University which is the third-class private university to use the entrance-examination broker. "Quarter Weak (*San-kyou, Ichi-jaku*)." The University of Tokyo is the best one among about ten first-class public universities which does not use the entrance-examination broker and 100% of the undergraduate students have a brain. Two professors of the University of Tokyo gave their historical and traditional 'Academic Harassment' to me at the University of Tokyo. They dropped their head abruptly towards me on March 14 and May 22, 2012. For your reference, Fukushima University and my old school, Mie University are near first-class public universities which do not use the entrance-examination broker and 90% of the undergraduate students have a brain.

Producer, it would be grateful if your TV corporation is interested in my research. These serious situations for our study in the academic field in Japan had been reported to the Board of Directors of the Japan Society for Medical Education on May 30, 2015. Please feel relieved, but a little.

Sincerely,

Yukihisa SHIDA (M.D., Ph.D., Mie University, Japan)  
Doctor and Chairperson of Sports — the fastest pace in history  
Member of the Roppongi Hills Club, Japan

Mr. Shiro Oguni, Director of NHK gave a lecture, saying "I (Mr. Oguni) am a *Senmon baka* (maniac, nerd...) in the news gathering field" as if he (Mr. Oguni) had a doctor's degree at the Roppongi Hills on June 29, 2016. Please be serious. NHK often confuses a person who has a bachelor's degree (third-degree) with a person who has a doctor's degree (first-degree). And the NHK TV programs call Japanese medical doctors' names with "Mr." or "*San,*" but this is not correct for us, medical doctors who have a doctor's degree from the brilliant, first- or near first-class public university, differs from the not-brilliant, money-powered backdoor, hence third-class private university like Juntendo University (Japan) from which the educators gather sixty million yen per student for medical education in the Japanese mass media's dark side in the 21st Century. Producer, our academic homepage "**chairperson.jp**" is presented by the M.D., Ph.D., Mie University, who was born in Mie Prefecture, Japan.

"They are the supple journalism in Japan" (??)
