

JAPAN SOCIETY OF NINGEN DOCK aims for a strong trusting relationship between facilities and subjects.

January 26, 2021

Japan Society of Ningen Dock (Complete Physical Examination) Japan
(Reply to a questionnaire survey on certified doctors and specialists of Japan Society of Ningen Dock)

There are many chairpersons and lecturers who are teachers or graduates of private universities at training workshops for certified doctors and specialists of Japan Society of Ningen Dock, which are held more than three times a year with a few hundred of attendants across the country or online. I would like to recommend that you consider placing a greater importance on brilliant doctors, chairpersons, and lecturers from national universities who have a feeling of tension rather than those from private universities including private Teikyo University (Tokyo) and private Tokyo Medical University that are famous as third-rate, money-powered, backdoor universities in the 21st century and use brokers (the family of university president who is a graduate of private Keio University and a secretary of the Diet member who is a graduate of private Waseda University) and require 60 million yen tuition. I have never heard a graduate of a private university says, "We use a broker for entrance examinations but we are not a third-rate backdoor university. We require 60 million yen tuition including donations but we are not money-powered mediocre, but brilliant."

In the 20th century, people in Mie Prefecture and Okayama Prefecture don't seem to think that a practitioner, a graduate of private Jikei University School of Medicine, who became famous for having wailed on TV in Mie Prefecture and a company president, a graduate of private Fujita Health University, who became famous for having tried illegally to take national examinations for medical practitioners nationwide are not as smart as to pass the entrance examinations for faculty of education of national universities (whose deviation value is more than 50). For your reference, doctors including myself who are graduates of national Mie University are not on a level with former imperial universities such as Nagoya University and Osaka University. The imperial universities say graduates of national Mie University need 3 more years of experience and the imperial universities hate wasting time. I am going to send "Paper on January 26, 2021 (Japan)" to luxury hotels in the Tokyo metropolitan area today. Igor Apraiz, Hotel Manager of Mandarin Oriental Hotel Tokyo is a graduate of Cornell University, an Ivy League university that emphasizes brilliant persons in the academic field worldwide.

For your reference, while Japan Society for Medical Education has refused my academic study, it invited a mediocre professor of private Nihon University who has a problem with his humanity as a doctor who said, "many patients (*Shinjatta*) died" in an inappropriate and casual manner at its training workshop for occupational health physicians. Also, a part-time doctor, a graduate of a private university in Tokyo, has worked once a week at a hospital I work for in the Tokyo Metropolitan area since last summer in 2020. He is in charge of medical checkup as well, but he lacks a sense of tension like professors of training workshops for Certified Doctors and Specialists of Japan Society of Ningen Dock or graduates of other private universities, saying "the lower is," "the bottom is," "Eh, Eh," "chatte." So I indirectly warn him by saying, "It is difficult for you, a graduate of a private university where mediocrities are dominant, to work here." On the day when a patient whose blood pressure dropped to 60 fell into a critical condition, he made a phone call to someone (outside the hospital, unidentified) on the mobile phone time and time again instead of calling the ward's family in the nurse station of the ward that he took charge of while on duty as a part-time doctor. Even he insists that he can read Chinese characters, CT, and cardiac electrogram and writes many English papers, if he neither belongs to the *Sanikai* (an academic clique of Faculty of Medicine, Mie University) nor works at an affiliated hospital of national Mie University in Mie Prefecture, he will be virtually fired for another reason because his medical level is equivalent of dismissal.

A grinning male news caster who is a graduate of a private university and a desk at the economy section of TV Asahi, an affiliated company of The Asahi Shimbun, one of the top mass media groups, told about suffered economic hardships including suicide victims due to the spread of COVID-19 without a sense of tension on a news program on December 14, 2020.

On December 29, 2020, a nurse in charge explained the results of health check data to a polite elderly patient who had a medical checkup next to me in my office at a health control center of a general hospital (336 beds) where I work as a part-time internal medical doctor every Tuesday. Since the nurse said "honto (really)?" "yeah, yeah, yeah," "Taka ~ (the numbers «the result of a blood test» are high!)," "Takaine (High)" to the patient, I said to a person in charge of the health control center, "I am a part-time doctor and work here only 10 days in a year, but normally, two full-time doctors work here. I think the nurse speaks to patients like that every day, so please let Director (a graduate of The University of Tokyo) know about the way she talks just for his information. You can tell him in the corridor. I conduct checkup examinations for a several dozen people at a special site prepared by agricultural cooperatives every week in Saitama. I find that 10 to 20% patients speak in the same manner as their family doctors who graduated from private Saitama Medical University or private universities (backdoor, money-powered, third-rate universities). The nurse is the same. I think maybe the center creates an atmosphere that lacks a sense of tension like a private F University in Fukuoka where the family that manages this medical corporation (24 hospitals, 3 clinics, 7 schools and 1 maternity hospital in Japan) serves as professor, a private K University in Kyushu, the owner's alma mater, and a private S University in Kyushu where a former head of the center who concurrently served as hospital director graduated from." The center sometimes conducts a survey on how doctors and nurses treat their patients, but it is considered to be so-called "blind spot" of a survey.

The Asahi Shimbun's weekly magazine, AERA, published an article on the results of the survey of more than one thousand doctors who are registered in a private company headed by a doctor of private Tokyo Women's Medical University in a way that could be interpreted as all Japanese doctors' real opinions. Asahi didn't publish an article on a Tokyo Women's Medical University' broker for entrance examinations and expensive school fees of 60 million yen, and it is lenient to Waseda University and Keio University.

On the other hand, a doctor who had worked at private Juntendo University Hospital for one year told me (a hospital patient's family, M.D., Ph.D., Mie University) in a "chatte" style at Mie Chuo Medical Center, an associated hospital of my alma mater, national Mie University (Mie Prefecture), so I said to him straight, "It is annoying that you provide medical care without a sense of tension like that. I would like someone else who is a graduate of a national university to be my father's doctor, because the doctor who used to be a full-time doctor of private Juntendo University Hospital is unfit for a doctor in charge of my father who was hospitalized in Mie Chuo Medical Center." However, the doctor was a member of the Sanikai, a school clique of Mie University Graduate School of Medicine, Faculty of Medicine, he continues to work at Mie Chuo Medical Center as if nothing happened. He purchases medical books, attends academic conferences and publishes papers as a doctor of Mie University Medical Center. He also continues to practice medicine at the respiratory medicine department, doesn't need to go out of Mie Prefecture, living as a doctor.

Frankly speaking, from my standpoint of medical education, the above-mentioned case study on professors, graduates, and full-time employees of private universities suggests that they cause trouble over brilliant and sharp doctors of national universities but they are not aware of it. I sent the attached letter to Gransta Tokyo, a commercial facility consisting of shops and restaurants in JR Tokyo Station, on January 20, 2021.

Thank you for your attention to the above.

Sincerely,

Yukihisa ShidaM.D., Ph.D., Mie University

The Asahi Shimbun's weekly magazine, AERA (January 25, 2021)

Gransta Tokyo in JR Tokyo Station

I heard the laughter of three clerks who gathered in around the center of the cash register at empty "Ekiben-ya (ekiben-shop) Matsuri" in Gransta Tokyo of JR Tokyo Station, Japan's largest "ekiben (box lunch sold on a train or at a station)" shop which appeared in a morning TV program on January 6, 2021. As you know, such work performance, similar to part-time students' work performance, has been seen since 2020 when the number of customers has sharply dropped due to COVID-19.

When I went to Keio University Libraries (Shinanomachi Media Center, Kitasato Memorial Medical Library) in

Tokyo as M.D., Ph.D., national Mie University living in the Tokyo Metropolitan area, I found library clerks didn't pay attention to the visit of myself, M.D., Ph.D. of Mie University, and laughed aloud in the library of the private university where 20 - 30% of mediocrities with deviation value being less than

50 are dominant. At the reception desk of an academic conference held by Japan Society of Ningen Dock at Granvia Hotel Okayama, a JR-West group hotel, on July 25, 2019, I saw the reception staff enjoying chatting, so I told them that I graduated from national Mie University and their reception staff's work performance was as poor as the one of private Kawasaki Medical School (a backdoor, money-oriented, third-rate university that requires 60 million yen for medical education expenses) where Chairperson of Japan Society of Ningen Dock (Complete Physical Examination), Kazuhiko Inoue serves as associate professor. I sent a paper regarding how a mediocre professor of cardiovascular surgery at private Juntendo University in Tokyo worked without a sense of tension to luxury hotels in Okayama, Utsunomiya, Fukushima, and Sendai. You may check the paper, "Paper on June 8, 2019 (Japan)," on an academic website, "chairperson.jp."

Since your shop is located in Gransta Tokyo (opened on August 8, 2020) in JR Tokyo Station, let me inform you that I sent a business letter ("Paper on September 1, 2020 (JR-EAST, Japan)" to Mr. Yuji FUKASAWA (Bachelor of Law, The University of Tokyo), president of JR-EAST on September 1, 2020. I think your staff should not create a bad tradition and should work honestly. For your reference, a part-time male staff worked at Michael Jordan Steakhouse (closed in 2018) in New York Grand Central Station where I had dinner on October 8, 2009, and he never chatted with other staff. And the library of Mie University Faculty of Medicine, my alma mater (where brilliant students are dominant), never creates such a stupid atmosphere that has no sense of tension like Keio University Libraries as well.

Thank you for your attention to the above.

Sincerely,

Yukihisa Shida M.D., Ph.D., Mie University

"Ekiben-ya (ekiben-shop) Matsuri" in Gransta Tokyo of JR Tokyo Station

日本人間ドック学会御中

(日本人間ドック学会 認定医についてのアンケート調査回答)

いつもお世話になります。

日本人間ドック学会主催 人間ドック認定医・専門医研修会(毎年3回以上、数百名以上の規模で日本全国またはWeb で開催)につきまして、研修会の座長、講師に日本の私立大学教官もしくは私立大学出身者を多く拝見します。21世紀、裏口金権三流大学として有名な私立帝京大学(東京)、私立東京医大など、入試 Broker(私立慶應大学《東京》ご出身 大学理事長 Family、私立早稲田大学《東京》ご出身 国会議員秘書など)を使い6千万円もの学費を出す凡才私立大学の教官、凡才でみえる私立大学医師、学者による座長、講師よりも、秀才国立大学の教官、秀才と言われ、緊張感のある国立大学医師、学者による座長、講師に重きを置かれることを検討されては如何でしょう。我々は、いわゆる入試 Broker を使っていますが裏口三流大学ではありません、大学への寄附金を含め6千万円の医学教育費ですが、金権の凡才ではなく秀才です、と説明される私立大学、私立大学出身者を私は拝見したことがありません。

20世紀お一人 TV に出演し号泣され、三重県で有名になられた私立慈恵医大(東京)ご出身の開業医の先生も、医師国家試験不正受験で全国的に有名になられた私立藤田保健衛生大学(現藤田医大)ご出身の現 会社社長(?)も、国立大学(教育学部など)入学学科試験(偏差値約50以上)に合格し、国立大学に入る頭(秀才)がおありになるとは、地元の三重県、岡山県でも思わない様です。なお私達国立三重大学、国立三重大学出身の医師も、私達以上に頭(秀才)を重視される国立名古屋大学、国立大阪大学など旧帝大においては同格として認められず、「3年早い」と言われ時間の無駄が嫌われます。私本日2021年1月26日付文書「Paper on January 26, 2021 (Japan)」を東京首都圏の高級 Hotel にお送りしますが、Mandarin Oriental Hotel 東京、Igor APRAIZ Hotel Manager のご出身大学 Cornell 大学も、世界の学術で頭(秀才)を重視してみえる米国 Ivy League です。

ご参考までに、日本医学教育学会は実質上私の学術を拒否してみえる一方、日本医師会主催 日本医師会認定産業医研修会では、「(多くの患者さんが)死んじゃった」など不適切な発言がみられ、医師として人間性に問題のある私立日本大学(凡才)教授にまで、東京都医師会から講演依頼をされてます。 また私の常勤内科勤務病院(東京首都圏)では、2020年夏より東京の私立大学ご出身の先生が新しく週1日の定期非常勤医師として日勤勤務され、健診業務もされてますが、人間ドック認定医・専門医研修会の私立大学教官もしくは他の私立大学出身者と同様、やはり「下が」「底が」「えーえー」「ちゃって」などを含む緊張感のない雰囲気でみえ、私から「ここ(凡才が支配的な空気の凡才私立大学)では難しい」と間接的にご注意申し上げています。患者さんが午後血圧60に下がり危篤になられた当日に、患者さんの家族に非常勤の担当医としてNurse Station から電話を掛けられる代わりに、病院廊下から当日の勤務とは関係のない相手先(宛先未確認)へ何度も電話で話し込んでもみえました。三重県の国立三重大学関連病院における三医会(三重大学医学部医学科学閥)以外の医師では、いつも通り漢字、CT、心電図が読め、英文の学術論文を多く書いてみえるとご主張いただいても、別件で事実上厳しい解雇になってしまわれる医療 Level です。

その他日本の Mass Media の Top Leader Group の一つ、朝日新聞社系列の TV 朝日 News 番組でも、 2020 年 12 月 14 日、「新型 Coronavirus 感染症流行による経済的犠牲者(自殺者など)」等について TV 局経済部 Desk が「ちゃって」調の緊張感のない解説をされ、にやつかれたお顔の私立大学ご出身の男性 Caster が News を伝えてみえました。

また 2020 年 12 月 29 日には、私の毎週火曜日午前の非常勤内科勤務先、東京首都圏総合病院(336 床)健康管理センターでの内科健診、人間ドックにて、年配の丁寧に話される受診者に対して、担当 看護師さんが「ほんと」「えーえーえー」「はい、はい、はい」「(血液データの値が) たかー」「高い ね」と、診察室内私の隣で健診 Data の説明を受診者にしていましたため、後で健康管理センターの 事務責任者に「私は非常勤内科医のため、1年に10日弱の当院健康管理センターの診療です。日常 はお二人の常勤の先生がみえまして、毎日のことでしょうから、病院長(国立東京大学ご出身)のお 耳に一応入れておいて下さい。病院廊下での立話で結構です。私 毎週県内各地の農協特設健診会場 にて数十名の健康診断に当たっていますと、そのうち1割から2割程の受診者で普段掛かり付けの 私立埼玉医大など私立大学(裏口金権三流大学)ご出身の先生と同じ雰囲気のそのような話し方をさ れる方がみえますが、今日の担当看護師さんも変わりありません。当院医療法人 Group (日本国内 で病院 24、診療所 3、学校 7、助産院 1 を運営)Owner 一族が教官をされてました私立 F 大学(福 岡)、ご出身大学の私立 K 大学(九州)、及び前健康管理センター長(当院《元》病院長兼任)ご出 身大学の私立 S 大学(九州) と同じくいわゆる私立大学の緊張感のない雰囲気の診療になってしま っています。」と後からお伝えしておきました。健康管理センターでは、受診者への医師、看護婦の 接遇などについて医療アンケートを時々行っていますが、いわゆるアンケート調査の死角と考えら れます。朝日新聞 Weekly AERA においても、医師千名以上を対象としてみえるものの、私立東京女 子医大医局入局医師が代表を務められる一民間企業の登録医師に対して行った医師アンケート調査 結果を、日本全体の医師の意見、本音とも受け取れる報道の仕方をしてみえます。私立東京女子医大 の入試 Broker、高額な学費 6 千万円については、早稲田大学、慶応大学に甘い朝日新聞 Daily も触 れてみえません。

その一方、私の母校国立三重大学の関連病院 国立病院機構 三重中央医療センター(三重県)でも、私立順天堂大学病院(東京)に過去1年間ご勤務経験のある内科医師が私(入院患者の家族、三重大学医学博士)に対して「ちゃって」調で話され、「その様な(私立大学の)緊張感のない医療では困ります。(元 私立順天堂大学《常勤》の先生では三重中央医療センター入院中の私の家族の主治医として不適格ですので)父親の主治医を他の(国立大学の)先生に代わって下さい」とはっきり申し上げたことがありますが、三重大学医学部医学科学閥 三医会の中の医師でみえるため、何事もなかった様に三重中央医療センターに勤務継続してみえる様です。これまで通り医学書を購入し、三重中央医療センターから学会出席並びに学術論文記載をしてみえ、呼吸器内科の臨床を継続。三重県を出る必要もなく、医師として過ごされています。

なお私の専門分野医学教育の観点からは、日本の医学学術学会におきます、私立大学教官並びに私立大学出身者、私立大学常勤者に関します上記 Case Study は、緊張感があり秀才の国立大学、国立大学医学博士にとりましては、迷惑という概念がおありにならないのが率直にご迷惑様で、先週 2021年1月20日付JR 東日本 Group 東京駅商業施設 Gransta 宛、別紙 Business Letter にも記載させていただきました。

以上、今後共どうぞよろしくお願い申し上げます。

志田幸久 三重大学医学博士

朝日新聞 Weekly AERA 2021 年 1 月 25 日号

いつもお世話になります。

2021年1月6日朝に、TV番組にもとり上げられる日本最大級の駅弁販売店、東京駅 Gransta「駅弁屋 祭」にて、レジカウンター内中央付近に集まってみえた店員さん3人の笑い声が、新型 Coronavirus 感染症流行下で空いていますお客さん5 人程の店内に響いてました。知ってみえます様に、この様な学生アルバイト並みの同店のお仕事ぶりは新型 Coronavirus 感染症流行によりお客さんが激減しました昨年2020年からしばしばみられています。

私東京首都圏在住の国立三重大学医学博士としまして、以前私立慶應大学の医学図書館(北里記念医 学図書館、信濃町メディアセンター、東京)を訪れたことがありまして、学部生の2~3割を占める 凡才(偏差値約50未満)が支配的な空気の私立大学らしく、図書館事務職員さん同士が秀才Brand の三重大学医学博士来館にも構わず医学図書館館内に響く笑い話をされてました。また2019年7月 25 日 JR 岡山駅直結、JR 西日本 Group Granvia Hotel 岡山等で開催されました日本人間ドック学会 の受付では、同じく談笑される学会受付 Staff が目立ち、「私は国立三重大学ですが、これでは学会 会長(井上和彦川崎医大《岡山県》准教授)の私立川崎医大(医学教育費6千万円の裏口金権三流大 学)と変わりません」とご注意させていただきまして、学術 Homepage「chairperson.jp」内「Paper on June 8, 2019 (Japan)」でみていただけます私立順天堂大学(東京都)の緊張感のない心臓血管外 科(凡才)教授の臨床は、岡山、宇都宮、福島、仙台の高級 Hotel にご紹介済です。しかしながら東 京駅 Gransta は「Paper on September 1, 2020 (JR-EAST, Japan)」の Business Letter を、2020 年 9 月1日私から深澤祐二社長(国立東京大学法学士)にお送りさせていただいています JR 東日本 Group、 東京駅構内商業施設 Gransta (2020 年 8 月 3 日開業) のお店でもありますので、悪しき伝統を創ら れず、きちんとご勤務していただいた方がよろしいかと思われます。ちなみに 2009 年 10 月 8 日に 私 Dinner をいただきました New York Grand Central 駅構内 Michael Jordan Steakhouse (2018 年閉 店)では当時アルバイトの男性 Staff もいらっしゃいましたが、店内で Staff 同志の談笑はしてみえ ず、私の母校(秀才が支配的な空気の)三重大学医学図書館でも、まず慶應大学医学図書館の様な緊 張感のないあほくさい雰囲気ではありません。

今後共、どうぞよろしくお願い申し上げます。

志田幸久 三重大学医学博士
