Dear Assistant General Manager,

This is the first time for me to send a letter about our study to your hotel. I am the Doctor and Chairperson of Sports in Japan. It is my pleasure to introduce our academic website chairperson.jp, which is visited from all over the world excluding China (?). For your information, I have informed about the “Chairperson 20th Anniversary Treatise” which is an unconventional style (not a full paper style) to the professors of the University of Tokyo in 2012, Harvard University in 2013, Oxford University in 2014 and Paris University in 2015 for the “Doping-Backdoor Theory,” the general managers or assistant general managers of hundreds of four or five-star hotels around the world for the “Chairperson Cocktail” and the regular members of the Vienna Philharmonic Orchestra for “My Way” in (2010 and) 2016. “There is one and only theory (using an examination broker and more than six million yen medical education fees) and cocktail (Cocktail ‘Olympic’ + Angostura Bitters) for universities and hotels in the 21st century.”

In contemporary Japan, there are approximately 85 national universities, 100 public universities, and 600 private universities. As a result of the declining birthrate and the subsequent decrease in the number of university applicants, more than half of these universities currently face enrollment shortfalls. At renowned universities such as Private Meiji University, Private Aoyama Gakuin University, National Chiba University, National Fukushima University, and National Mie University, around 50% of undergraduate students are considered “mediocre students” who lack clear evidence of an academic deviation score above 50.

In private universities, there are institutions known for their exorbitantly high tuition fees, particularly for medical education. For example, medical education at Teikyo University, Tokyo Medical University, Tokyo Women's Medical University, and Aichi Medical University costs over 60 million yen through the use of an examination broker. At Fujita Health University, medical education costs for many mediocre students exceed 70 million yen and are considered extremely high. This includes an infamous case of a (former) mediocre graduate student who was caught cheating on the National Medical Licensing Examination. His medical education costs are estimated to have exceeded 100 million yen or one million USD, which is most likely the worst recorded cost for medical education in Japan. It should be noted that caution is necessary with Japan's major newspaper Asahi Shimbun, which has been acting as a “*taikomochi* (jester)” for Fujita Health University from the past. The term “*taikomochi*,” a uniquely Japanese metaphorical expression, originally referred to someone who played drums to liven up the atmosphere at banquets, but it has come to mean a person who flatters others or acts obsequiously to gain their favor. Meanwhile, the University of Tokyo, disproportionately emphasized by Japan's mass media, faces serious issues of academic harassment, often described as “head-dropping treatment,” referring to a response where one's head forcefully slumps downward, like a chicken. Moreover, Private Waseda University and Private Keio University, two private institutions to which the mass media is also devoted, lack proper business manners. [Reference: “Paper on April 17, 2023 (Malaysia)” and “Paper on January 1, 2024 (Keio University, Japan)” on the academic website chairperson.jp]

“Big Money, here” 「バカ高い、ここ」

Assistant General Manager, I would be grateful if your hotel could take some interest in my research. No response will be needed. Academic harassment by national universities, such as the University of Tokyo and Kyoto University, was reported to the Board of Directors of the Japan Society for Medical Education on May 30, 2015. However, there has been absolutely no improvement in my (Dr. Shida's) circumstances as a doctor both before and after that time. I am content that your hotel becomes familiar with our cocktail “Chairperson.”

Sincerely,
Yukihisa SHIDA (M.D., Ph.D. from Mie University, Japan)

I am arranging the following travel itinerary for a business trip to Singapore and Jakarta from October 19 to October 22, 2025. I will stay at Marina Bay Sands in Singapore on October 19, The Langham Hotel Jakarta on October 20 and Four Seasons Hotel Jakarta on October 21 and 22, 2025. Executive Assistant Manager, I have sent the “Letter to the Board of Directors of the Japan Society for Medical Education” (not “Letter to the Editor”) last month (September 17, 2025), after a lapse of ten years since my previous letter, dated May 30, 2015. As you are no doubt aware, in 2015 a fierce competition arose between Japan and China for the contract to construct Indonesia’s high-speed railway. On September 29 of that year, the Government of Indonesia ultimately awarded the project to China. Subsequently, the Jakarta–Bandung high-speed railway, built by China, was inaugurated in October 2023 and has been in operation since. From a cultural perspective, it may be observed that in China a distinction exists between “face” (*mianzi*, the concern for social reputation and external appearances) and genuine intention, whereas in Japan the contrast is drawn between *tatemae* (the socially expected or formal stance) and *honne* (the underlying true intent). This divergence between outward expression and internal reality is evident not only in the conduct of Japan’s prime ministers but also in that of Japanese physicians.

知って見えます様に、Indonesia の高速鉄道建設を巡り 2015 年に日本と中国の間で激しい受注争いが繰り広げられまして、2015 年 9 月 29 日 Indonesia 政府は中国を選ばれました。そして 2023 年 10 月、中国が建設した Jakarta–Bandung 高速鉄道が開業し、現在に至っています。中国人が「面子と本音」がおありになるのに対して、日本人は「建前と本音」がありまして、日本の総理大臣、また医師におきまして、「建前」と「本音」は違います。

The Face (*mianzi*, the concern for social reputation and external appearances) and Genuine intention of Chinese President

On September 1, 2025, President Xi Jinping of the People's Republic of China stated at the Shanghai Cooperation Organization (SCO) summit, "*We oppose hegemony and bullying. We should promote a multipolar world of equality and order, and advance the establishment of a fairer and more equitable system of global governance.*" In doing so, he gave face (*mianzi*) to the presence of other national representatives—such as Russia's President Vladimir Putin, India's Prime Minister Narendra Modi, and Indonesia's Foreign Minister Sugiono, among dozens of countries—while at the same time speaking his true intentions. Of course, President Xi was not referring to China's domestic affairs.

2025 年 9 月 1 日、中国の習近平主席は上海協力機構の首脳会議で「覇権やいじめ行為に反対します。我々は平等で秩序ある世界の多極化を推進し、より公正・公平な世界統治システムの構築を促進すべきです」と述べられ、Russia の President Vladimir Putin、India の Prime Minister Narendra Modi の他、Indonesia の Foreign Minister Sugiono など数十か国の国の代表の面子を立てられた上、本音を語られました。もちろん、習主席は中国の内政問題について述べられた訳ではありません。

Japanese Prime Minister

Japanese Prime Minister Shigeru ISHIBA on September 7, 2025

“‘I was concerned about having long been called stingy,’ Prime Minister Ishiba said. This sense of inferiority—particularly in comparison with the ultra-wealthy—may have been reflected in his facial expressions and behavior.”

「石破総理は、『私は長年ケチだと言われてきたことを気にしていました』と述べてみえます。この劣等感は、とりわけ超富裕層との比較において、彼の表情や言動に反映されていたのかもしれませんが。」

The Tatemaie (the socially expected or formal stance) of Japan’s Prime Minister

“It is often said that shoplifting is the gateway to delinquency. In today’s society, overflowing with material goods and information, it is essential to provide heartfelt guidance that truly reaches the hearts of children, so that—even if only temporarily—they do not lose sight of themselves and resort to acts such as shoplifting or theft.” (November 30, 1995, Nagano Prefectural Board of Education, Japan)

On October 4, 2024, in his first policy speech to the Diet after assuming office as Prime Minister, Shigeru ISHIBA expressed profound regret over the “slush fund scandal” of the previous administration led by Shinzo ABE (the late). He pledged to pursue politics *for the people, not for the politicians*, and emphasized his commitment to strictly holding Diet members accountable for complying with established rules.

「万引きは非行の入口と言われております。物や情報のあふれる世相の中であって、一時的ではあれ、自分を見失って万引きや窃盗などの行動に走ることがないよう、子どもの心に届く親身の指導が必要です。」(1995年11月30日 長野県教育委員会)

2024年10月4日、首相就任後の最初の国会所信表明で、石破茂首相は（故）安倍晋三 前政権の「裏金 Scandal」について深い遺憾の意を表明し、「政治家ではなく国民のための政治を目指す」と約束しました。また、議員が Rule を順守するよう厳しく責任を負わせる姿勢を示しました。

The Honne (the genuine inner feelings or true intentions) of Japan's Prime Minister (the underlying true intent)

On October 27, 2024, fifteen Liberal Democratic Party members of the House of Representatives who had just been elected for the first time each received gift certificates worth 100,000 yen—amounting to a total of 1.5 million yen (approx. USD 10,300 at an exchange rate of 145 yen to the dollar)—from the side of Prime Minister Shigeru ISHIBA on March 3, 2025. Prime Minister ISHIBA explained that these were “prepared as pocket money in lieu of souvenirs from dinner gatherings and as a token of appreciation for their families,” adding that he had “lost sight of himself.” Although the act was technically legal, it failed to gain public understanding and rebounded upon him as his own slush fund scandal. At that time, he also failed to present himself as strictly accountable. Consequently, the ruling Liberal Democratic Party suffered three consecutive defeats—two in national elections and one in the Tokyo metropolitan election. Finally, on September 7, 2025, he announced his resignation at a press conference.

Finally, I would like to present the e-mail that I sent last month to a major Japanese pharmaceutical company, together with the lyrics of “*Hikoukigumo*.” In Japan’s private universities, there are many mediocre physicians and medical staff, and it is unfortunately common to encounter medical practice at an elementary-school level.

そして最後に、先月日本の大手製薬会社にお送りしました E-Mail と、「ひこうき雲」の歌詞をご紹介します。日本の私立大学では凡才医師、凡才医療 Staff が多く、小学生 Level の医療は普通です。

To: Mitsubishi Tanabe Pharma Corporation, Japanese Pharmaceutical Business Division

I hope this message finds you well. On the morning of September 11, 2025, while on my way to work at Tokyo Station, I happened to listen to Yumi ARAI's song "*Hikōki-Gumo (Contrail)*". It brought back memories of the study session hosted by Mitsubishi Tanabe Pharma, which prompted me to write this e-mail.

At the in-hospital briefing on the medication held on September 8, I regret to note that, apart from myself, physicians from private universities and head nurses continued unrelated conversations in the conference room and even made phone calls there, which was discourteous. It would be desirable if they could understand that "this is a study session, so please remain quiet." From the standpoint of a national university, however, it appears that (mediocre) physicians and medical staff from (third-rate) private universities such as Tokyo Medical University and Dokkyo Medical University demonstrate conduct reminiscent of classroom disorder, and their level of medical practice remains at that of an elementary school. I confirmed with the hospital pharmacy director today that the prevailing situation continues to be one of "*dark clouds,*"

Furthermore, my personal private office space of approximately 3.3 square meters (for work and study) within the hospital medical department has on occasion been intruded upon and disturbed primarily by physicians who are graduates of private universities, who still do not seem to recognize the impropriety of their actions.

I sincerely appreciate your continued support and cooperation.

いつもお世話になります。2025 年 9 月 11 日今朝、通勤途中の東京駅で荒井由実さんの「*ひこうき雲*」を聞きまして、田辺三菱製薬によられます勉強会が思い出され、本 Mail を記載しています。

今週 9 月 8 日の薬剤の病院内説明会では、(私以外の) 私立大学の医師と看護師長等が会議室内で、関係のないお話を続けられ、室内で電話も掛けてみえまして、失礼いたしました。「今は勉強会ですので、お静かに」と分かっていたかとよろしいのですが、国立大学からしますと私立東京医大、私立獨協医大など(三流)私立大学の(凡才)先生方、医療 Staff によられます学級崩壊、小学生 Level の医療にて、本日病院薬局長にも確認しましたが、現状いつも「*雨雲*」です。

また、病院医局内私専用の 2 畳の個室(仕事、勉強部屋)も、まず私立大学の先生方から時々荒らされてまして、まだ気づいていただけていないご様子です。今後ともよろしくお願いいたします。

Japanese Song: “Hikōki-Gumo” (Contrail / Vapor Trail)

Lyrics: Yumi ARAI (now Yumi MATSUTOYA, Japanese singer-songwriter)

Music: Yumi ARAI (now Yumi MATSUTOYA, Japanese singer-songwriter)

The white slope stretched all the way to the sky.
Shimmering heat haze gently wrapped around that child.
Not noticed by anyone, all alone,
the child ascends upward—
fearing nothing, then soaring high.

Longing for the sky,
racing across the sky,
that child’s life is a contrail.

At that tall window, even before death came,
the child was gazing at the sky—now unknowable.
To others it cannot be understood,
they only think: “too young, far too young.”
Yet, it was happiness.

Longing for the sky,
racing across the sky,
that child’s life is a contrail.

Longing for the sky,
racing across the sky,
that child’s life is a contrail.

ひこうき雲

作詞：荒井由実（現 松任谷由実）

作曲：荒井由実（現 松任谷由実）

白い坂道が空まで続いていた
ゆらゆらかげろうが あの子を包む
誰も気づかず ただひとり
あの子は昇っていく
何もおそれない、そして舞い上がる

空に憧れて
空をかけてゆく
あの子の命はひこうき雲

高いあの窓で あの子は死ぬ前も
空を見ていたの 今はわからない
ほかの人には わからない
あまりにも若すぎたと ただ思うだけ
けれど しあわせ

空に憧れて
空をかけてゆく
あの子の命はひこうき雲

空に憧れて
空をかけてゆく
あの子の命はひこうき雲

This song is based on a true story of a child who passed away at a young age in a hospital due to illness in Japan. Of course, it is not the story of a child who took his own life out of despair over Japan's mass media—such as the Asahi Shimbun Group—which writes flattering articles about private backdoor and money-powered university, and reports Japan's economic issues on television in an elementary-school manner, without any sense of seriousness, repeatedly saying things like “*chatte*,” “*chatte*.” Although it is an old song released in 1973, third-rate private universities such as Juntendo University, Kyorin University, Tokyo Medical University and Dokkyo Medical University now carry a new atmosphere of “dark clouds.”

病気のため、病院で若くして亡くなった子供の実話が基になっています。もちろん、私立裏口金権大学について太鼓持ちの新聞記事を書かれ、日本の経済問題を「ちゃって」「ちゃって」と小学生 Level で緊張感なく TV で報道してみえる朝日新聞 Group などの日本の Mass Media に悲観して、自殺された子供の話ではありません。1973 年発表の古い曲ですが、順天堂大学、杏林大学、東京医大、獨協医大などの三流私立大学につきましては、新しい「雨雲」の雰囲気です。
