

Questions and Answers on the Homepage “chairperson.jp”

First of all, please let us know Dr. Yukihiisa Shida’s research schedule for the next one year starting from January, 2018.

We launched this academic page “Questions and Answers on the Homepage ‘**chairperson.jp**’” on January 26, 2018, Dr. Shida’s 56th birthday at the One World Trade Center in New York City in 2018. After going to New York, Boston and Washington D.C. in January and Taipei in April, 2018, Dr. Shida will make a business trip to Las Vegas and Vancouver in July, 2018, then to Oslo, Stockholm and Rome in January, 2019. Before Dr. Shida’s 60th birthday of January 26, 2022, the “**Chairperson Anniversary Letters**” will be sent to quality newspaper companies, magazine companies, and news bureaus of TV companies, a few years behind its originally scheduled 2019 completion date. The persistent (necessary?) academic harassment to Dr. Shida has continued by the academic clique of the *Sanikai* (Alumni Association of Mie University Faculty of Medicine), Kyoto University and Tokyo University in Japan in 2018, after I sent the academic paper to the Japan Society for Medical Education on May 30, 2015. The letters to editors will become a milestone for the “**Chairperson 20th Anniversary Treatise.**”

“Brilliant (*Shuusai*), still not Professor”

Dr. Shida

One World Trade Center

Why hasn’t the **Doping-Backdoor Theory** been understood?

The reason is that in Japanese private universities, such as Nihon University, Kindai University (former Kinki University) and Fukuoka University... people are mediocrities and it is difficult for them to understand the theory. Most of them are at the Intellectual level (IQ, Deviation scores...) where they don’t have the custom of reading Time or Newsweek magazines and are not confident in their academic records. Prime Minister Shinzo Abe was also not smart enough to be admitted into the Fukushima University (national university)

“Mediocrity (*Bonsai*)”

Mr. Abe

and he is not called graduates from given that they like seems to be poor. of private universities, Russia and China, the seems to be beyond press conference.

Mr. Putin

brilliant at the Prime Japanese Minister’s Office or the White House. In addition, those private universities often do not name the university from which they graduated and blue jokes and topics about nurses or wives in academic circles, their business manner Dr. Shida has never ever received any academic observation that says, “We, the faculty have been able to understand the **Doping-Backdoor Theory.**” Moreover, overseas, in home of backdoor admissions, and also at Harvard University or Oxford University, it permissible discussion as is the case with the annual year-end Russian President’s

Why hasn't the cocktail "Chairperson" been understood?

The reason is that bartenders are not very much interested in academics which is hard for them to understand. The At.Mosphere Restaurant & Lounge of Burji Karifa in Dubai did not success to make a glass of the cocktail "Chairperson" when I told them the cocktail's name two times and two head bartenders of Palace Hotel, France did not seem to know the cocktail "Chairperson." Of the world's No.1 bartenders, though Ms. Naomi Takahashi understands the cocktail, it seems difficult for Mr. Fumiyasu Mimitsuka to understand it. Dr. Shida has never ever received any observation that says, "We, the Bartender Association, including the Korean Bartender Guild, know the cocktail 'Chairperson.'"

Cocktail "Chairperson"

Bar Director of the Plaza Athenee Paris
Mr. Thierry Hernandez

Chief Bartender of the Bristol Hotel Paris
Mr. Maxime Hoerth

"World No.1 Bartender (2013)"
Ms. Naomi Takahashi

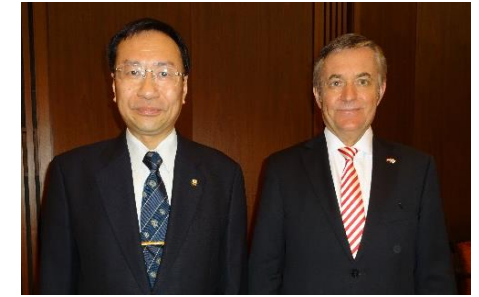

"World No.1 Bartender (2012)"
Mr. Fumiyasu Mimitsuka

Why hasn't "My Way" been understood?

The reason is that in Japanese public universities, people are brilliant and love their academic cliques, so it is difficult for them to understand it. It is said at Harvard University and Oxford University that the University of Tokyo (national university) and Kyoto University (national university) have their strong academic cliques. Professors of Japanese public universities drop their head abruptly, give a sigh or a whistle ... and academic sites have the atmosphere of making academic harassment of Dr. Shida. There is no academic observation that says, "We, the faculty of public universities, have been able to understand 'My Way.'" However, citizens in Vienna can understand "My Way." As citizens in Vienna who love Winer music and bood...Conductor Seiji Ozawa, they could understand the historical and traditional technique of the University of Tokyo and Kyoto University that love each of their academic cliques; drop their head abruptly, give a sigh or a whistle, or call Dr. Shida mediocrity (*bonsai*) of private university, force him to buy nurses...at the academic scene where the atmosphere of academic harassment to Dr. Shida (Doctor and Chairperson of Sports) has been created.

Wiener Staatsoper

Austrian Ambassador to Japan
Mr. Hubert Heiss

Dr. Shida is saying that in the case of backdoor admissions in Japan, the cost of medical education surpasses 60 million yen in order to pass the national examination for medical practitioners. Tell us about the grounds for this figure. Funds of 60 million yen (531,000 US\$, 1 US\$ = 113.00 yen as of December 30, 2017) or more are needed for backdoor admissions. This is a rough (“*Koshidame*”) estimate considering ordinary tuition for a private medical school (ranging from a little less than 20 million to 50 million yen) in the 21st century, school bonds or donation of up to 10 million yen as recommended by the Ministry of Education, Culture, Sports, Science and Technology and Ministry of Health, Labor and Welfare. The Japanese mass media in the 21st century widely reported that Teikyo University (private university) is a back-door and money-driven university, but this represents just the tip of the iceberg. At an alumni reunion of Fujita Health University (private university) that has Japan’s largest university hospital (1,453 beds), if the university staff, including President Kiyotaka Hoshinaga, the executive secretary and all the graduates in this century, honesty respond to a simple questionnaire survey on medical educational research that Dr. Shida (an advocate of the Doping-Backdoor Theory since 1999 and Ph.D. of Mie University) conducts, an accurate amount of medical education expenses (acknowledged as not backdoor admissions by the Ministry of Health, Labour and Welfare) that exceeds 60 million yen «531,000 US\$», more than 70 million yen «619,000 US\$» could be calculated. With an eye toward the Tokyo Summer Olympic and Paralympic Games in 2020, if the latest figure is verified, based on discussions between a researcher on the backdoor admission university (Dr. Yukihisa Shida) and the President of the World Federation for Medial Education (Dr. David Gordon), applying for the Guinness Book of Records by the president of Fujita Health University might not be a mere dream on the grounds that “In terms of school fees, this (Fujita Health University) tops the global list.”

“Gold Hands”
Dr. Hoshinaga

“*Soko, Sekaichi* ” (?)
“World’s No.1. Bottom (70 million yen) ” (?)

Dr. Gordon

If those who have their deviation scores of 50 or higher are supposed to be brilliant enough to pass a scholastic ability examination to enter a national university in Japan, will those Japanese whose deviation score ranges from 40 to 49 not be able to become medical practitioners?

Sho Sakurai, a Japanese famous talent who has played doctor role, is mediocrity whose deviation score ranges from 40 to 49. However, he uses an entrance exam broker and are judged by a private university that he or his family can afford to 60 million yen or more in medical education fees, there is a good possibility that they would be admitted from the backdoor and become a money-powered doctor. As for the national examination for medical practitioners that they sit for after graduating from medical schools, as a result of its having become easier in the 21st century, if they take it, they will pass it in actuality. If you pay about 60 million yen, you will then pass it without problem. Given that annual incomes for nurses and clinical laboratory technicians whose range of medical act are about a less than 5 million yen (375,00 US\$) and those of doctors who have a medical license (that allows them to conduct the entire scope of medical act) are about a more than 15 million yen (1,130,000 US\$), their tuitions of 60 to 70 million yen that they or their parents paid by working their head off will be recovered in no more than 10 years.

“*Mediocrity (Bonsai)*”
Mr. Sakurai

A company employee who failed to pass an entrance exam for School of Medicine, Tokai University (private university, Japan) and whose annual income is 4 million yen (36,000 US\$) appears to have failed to enter any of about 80 medical schools across the nation. [Japanese average annual income is 4.2 million yen in 2016.] He said his life is not easy and they say some feel sorry for him who had failed fiercely competitive university entrance examinations to become a doctor. Then, if a Japanese, whose Japanese deviation score is 40 ~ 49, wants to try to obtain a national qualification to aim for a higher income for him/her or his/her family, is the door shut on him/her?

In the 21st century, the national bar examination has also become easier in Japan. In the case of law school, it costs around 4 million yen «36,000 US\$» as educational expenses to pass the bar exam even at a private school so if you can't afford to aim for a doctor and become a lawyer instead with a budget of 4 million yen, you can expect to be able to earn a high income in the future and the upper door would open to the Esquire Club (the Bunny Girl Club in Japan, the standard annual salary for membership is 10 million yen «90,000 US\$») or Roppongi Hills Club Japan (screening of entrance qualification is held behind closed doors). When you also go to the Golden Lion Club of the Imperial Hotel Tokyo (the standard annual salary for membership is 30 million yen «265,000 US\$»), you can see Mr. Taro Aso, Deputy Prime Minister and Minister of Finance and former Prime Minister who is a preppy and good at sports and English but mediocrity and not good at Kanji, relaxing and sitting on the sofa in the club room. In the case of a person of ordinary ability (mediocrity) whose deviation score doesn't grow from deviation score below 50 and who is unable to save funds worth 60 million yen or more, Dr. Shida suggests that he/she aim for a lawyer with the average score (mediocrity) instead of becoming a nurse, because there isn't enough budget like that amount (60 million yen) and you cannot

Tokai University Hospital (804 Beds)

Aichi Medical University (private university) or Fujita Health University (private Nanzan School of Law (private school) or Aichi Law School (private school) in enter the school (a graduate school) as your final closed because no students of the school could However, a Japanese novelist assured that Mr. he enters a safety university and law school, then talent who played the role of lawyer in a TV below 50 in Japan. There is thus no problem to million yen.

“Mediocrity (*Bonsai*)”

Mr. Aso

clinical laboratory technician or judicial scrivener. If you feel tough use a broker for entrance examinations for the faculty of medicine of university), Dr. Shida would recommend you to go to Japan. Also, Dr. Shida suggests you you try to academic background. Tokai Law School will be pass the National Examination for Lawyers in 2013. Toshiaki Megumi will also become a real lawyer (if studies law a bit). Megumi, a Japanese famous drama, has mediocrity and his deviation score ranges pass the National Examination for Lawyers for 4

“Mediocrity (*Bonsai*)”

Mr. Megumi

Why isn't the name of Dr. Yukihisa Shida listed in the official handbook of (the past) Japan Table Tennis Association (JTТА)?

Dr. Shida used to be asked to conduct medical examinations, give guidance on doping or lectures on sports and attend international competition-related conferences and others for the All Japan Table Tennis Team but he was a part-time doctor so he was not listed as a team doctor on JTТА's official handbook for the All Japan Team. Dr. Shida is a (former) part-time Team Doctor of the Japan Table Tennis Team and representative of Japan. For your reference, of Dr. Shida's papers on sports medicine, past Japanese papers except English ones posted on the homepage “chairperson. Jp.” To Dr. Shida's regret, his papers in Japanese were only half-finished because he suffered academic harassment by the Sanikai (Alumni Association of Medical Course of Faculty of Medicine, Mie University) at Mie University Hospital from 1988 to 1992.

Why doesn't Dr. Shida present papers on the results of his studies or a full paper?

When academic harassment to Dr. Shida by school cliques at Mie University, Kyoto University and the University of Tokyo comes to an end and he can ensure a post of professor at his alma mater Mie University and research funds, he will be able to attend an academic meeting and write a full paper on the **Chairperson 20th Anniversary Treatise** but it costs approx. 500 million yen (4,420,000 US\$) for 30 years for those aged from 30 to 60 as is the case with Dr. Motoh Iwasa, (temporary) professor at Mie University. [Dr. Iwasa won over his colleague (Dr. Shida) and rivals (?), so became a professor at Mie University (national university), despite of his low humanity (B rating).] The faculty at any of Mie University, Kyoto University and the University of Tokyo has paid not a single yen without any apology. First and foremost, it is essential for them to understand “My Way.”

“Brilliant (*Shuusai*)”

Dr. Iwasa

Why doesn't the Japanese media report Dr. Shida?

The biggest academic clique in the Japanese mass media is made up of those graduates from Waseda University (private university, Japan), who are persons of Mediocrity (*Bonsai*), account for 20 to 30%. Therefore, they prefer graduates from private universities who are not the smartest and private universities to those brilliant graduates from public universities and national universities and Dr. Shida assumes that they keep a distance from a smart medical doctor who graduated from Mie University. Generally speaking, at Japanese private universities, those with ordinary ability are predominant and they don't give due respect to public universities where smart students are predominant, such as Mie University, and they don't have much basic business manner in which they should distinguish clear-headed doctors who graduated from national universities from the unintelligent counterparts who graduated from private universities, and calling them "*Sensei*" or Doctor. Customers of Imperial Hotel Tokyo or the Roppongi Hills Club Japan who have such not good manners as shouting or not telling the name of the university they attended are graduates of private universities including Keio University or Kyorin University. For your information, there are slogans, such as 'Walk down the hallway quietly' and 'First, say your name and class, and behave politely to teachers' at elementary schools.

We hear that Dr. Shida is not brilliant enough to have passed Fukushima University or a graduate of Mie University now (in the 21st century), and he is the same as mediocrities who are graduates of private universities such as Aichi Medical University or the Jikei University School of Medicine (private university, Japan) and like blue jokes in Japan. Is it true?

Indeed, Dr. Shida hears that a doctor who graduated from Akita University (national university, Japan) has an evaluation on Dr. Shida and said that, but it's wrong. The correct answer is "Dr. Shida is a brilliant graduate of Mie University and well-balanced with doctors who graduated from national universities including Hirosaki University (national university, Japan)." [Dr. Osamu Taguchi, present Professor of Mie University got remarried to a female doctor who graduated from Hirosaki University without being pressured into buying nurses (blue jokes and topics about nurses).] What the doctor said can be regarded as disparaging and has not forgotten, so further medical education should be needed for Akita University.

Yukihisa SHIDA, M.D., Ph.D.

Team Doctor of the Japan Table Tennis Team (1990-1994)

Chairperson of the International Table Tennis Federation Sports Science Congress (1991)

学術 Homepage 「chairperson.jp」 についての質疑応答

始めに、2018年1月から今後1年間の志田幸久医師の Research Schedule について教えて下さい。

2018年1月26日、志田医師が56歳の誕生日に New York の One World Trade Center を訪れ、「Questions and Answers on the Homepage “**chairperson.jp**”」の学術 Page が Homepage 「**chairperson.jp**」に Up されました。今後1年間の志田医師の Research Schedule は、2018年1月の New York、Boston、Washington、D.C.、4月の台北、7月の Las Vegas、Vancouver 出張を経て、2019年1月に Rome、Stockholm、Oslo 出張予定です。なお「**Chairperson Anniversary Letters**」の世界の高級新聞社、高級雑誌、報道 TV 局への発送は、当初2019年の日程より数年遅れ、志田医師の60歳の誕生日（2022年1月26日）までの予定になりました。2015年5月30日、学術 Paper を日本医学教育学会にお送りしてからも、三医会（三重大学医学部同窓会）、京都大学、東京大学の学閥による私への執拗な（必要な？）Academic Harassment は、2018年も続いています。ちなみに Editor などへの Letter は、「**Chairperson 20th Anniversary Treatise**」の一つの節目になります。

なぜ、「**Doping-Backdoor Theory**」が理解されていないのでしょうか？

日本大学、近畿大学、福岡大学など日本の私立大学では凡才が多く、理解が難しいためです。彼らのほとんどが Time、Newsweek を読む習慣がなく、学歴について自信を持ってみえない学術 Level (IQ、偏差値...) です。日本の安倍晋三総理も、国立福島大学に合格する程の頭はお持ちでなく、日本の総理官邸、White House でも秀才とは言われません。また私立大学は、しばしば自らの出身学校名を名乗られず、学術の現場でも、Wife、看護婦など下ネタがお好きで、Business Manner は弱く拝見します。「私達私立大学教授陣は、**Doping-Backdoor Theory**を理解することが出来ました」との、学術的見解を伺ったことも、一度もありません。また海外では、Backdoor の本場 Russia、China、及び Harvard 大学、Oxford 大学などでは、年末恒例の Russia 大統領の大記者会見の様に、議論の許容範囲外の様です。

なぜ、Cocktail 「Chairperson」が理解されていないのでしょうか？

Bartender さんは学術に余り興味をお持ちでなく、理解が難しいためです。Burj Khalifa Dubai の Restaurant & Lounge は、過去2回、Cocktail の名前をお伝えするだけでは **Cocktail 「Chairperson**」作っていただけず、France Palase Hotel の Head Bartender お二人も、**Cocktail 「Chairperson**」ご存知ない様子でした。世界 No.1 パーティンダーさんでも、高橋直美さんをご理解いただいています。耳塚史泰さんは理解が難しい様子です。韓国 Bartender 協会を含め、「私達（各国の）Bartender 協会は、**Cocktail 「Chairperson**」を承知しています」との、見解を伺ったことは、これまで一度もありません。

なぜ、「**My Way**」が理解されていないのでしょうか？

日本の国公立大学では秀才が多く学閥を愛し、理解が難しいためです。国立東京大学、国立京都大学も、Harvard 大学、Oxford 大学で頭があり学閥が強いと言われます。また国公立大学は、頭をガクッと落とす、ため息、口笛などが見受けられ、学術現場は志田医師に対する Academic Harassment の雰囲気です。「私達国公立大学教授陣は、**My Way**」を理解することが出来ました」との、学術的見解を伺ったことも、一度もありません。しかし、音楽を愛し、小沢征爾指揮者に Boing を投げかけられた Wien 市民におかれましては、学閥を愛する東京大学、京都大学が志田医師に対して行った歴史と伝統の学術的技術、ガクッと頭を落とす、口笛、溜息などをご理解いただけることと思われまます。

日本の裏口入学では、医師国家試験に合格するための医学教育費に 6,000 万円以上掛かるとの、その数字の根拠を教えてください。

「6,000 万円以上が裏口入学」との数字は私立大学の 21 世紀の正規の医学部医学科の学費（2,000 万円弱～5,000 万円弱）に文部科学省、厚生労働省が推奨する 1,000 万円までの学債、寄附金を勘案した金額、「腰だめの数字」です。21 世紀、日本の Mass Media で裏口金権大学と大きく報道されたのは私立帝京大学ぐらいですが、しかしこれは氷山の一角にすぎません。日本最大の大学病院（1,435 床）を有する私立藤田保健衛生大学の同窓会で、仮に私（Doping-Backdoor Theory since 1999 提唱者、三重大学医学博士）からの医学教育研究の簡単なアンケート調査に、星長清隆学長以下、大学事務長、今世紀の卒業生医師全員に正直にお答えいただければ、卒業生の医学教育費の平均が、（厚生労働省が裏口入学でないと容認する）6,000 万円未満を超える 7,000 万円以上の正確な金額が出るかもしれません。2020 年東京 Olympic に向けて最新の数字が確認されれば、裏口金権大学の研究者（志田幸久医学博士）と World Federation for Medical Education 会長（Dr. David Gordon）の専門家協議により、「学費だけでは、ここ（藤田保健衛生大学）が世界一」として、私立藤田学園大学学長（星長清隆医学博士）から Guinness World Records 申請も夢ではありません。

日本で国立大学に合格します偏差値 50 以上を秀才としますと、偏差値 40 台の日本人は、医師にはなれないのでしょうか。

日本の有名 Talent、櫻井翔さんは映画で医師の役をされていますが、偏差値 40 台、凡才の日本人です。しかし、入試 Broker を使い、6,000 万以上医学教育費を積むことに無理がないと私立大学で判断されれば、裏口金権医師になれる可能性は十分にあります。医学部卒業後受験する医師国家試験についても 21 世紀に易しくなった結果、受ければ合格する状況です。6,000 万円なら大丈夫です。出来る医療行為が限られる看護師、臨床検査技師の年収を 500 万円弱、医師免許（医療行為全て出来る資格）を持つ医師の年収を 1,500 万円強としますと、そこまで頑張った学費 6,000 万円、7,000 万円も 10 年で元が取れます。

ある私立東海大学医学部医学科不合格の年収 400 万円（日本人の平均年収は、2016 年で 420 万円）の会社員は、日本全国に約 80 ある医学部医学科どこにも入れなかった様です。生活は楽ではなく、医師になる受験競争の敗者として「気の毒」との声も聞かれます。では偏差値 40 台から日本の国家資格を取得して、家族のためにもより上の収入を目指す道は閉ざされてしまっているのでしょうか。

21 世紀、日本では弁護士国家試験も易くなりました。法科大学院でしたら、私立でも弁護士国家試験に合格するための法学教育費は 400 万円程で、医師が無理でも、代わりにぎりぎりの予算 400 万円ですれば将来的に高収入が見込め、Esquire Club（日本の Bunny Girl Club、入会年収目安 1,000 万円）、六本木 Hills Club（入会審査非公開）も扉が開きます。また帝国 Hotel 東京・Golden Lion Club（入会年収目安 3,000 万円）に行けば、世間知らずな程育ちが良く、Sport、英語がお得意な一方、凡才で漢字が苦手で見える元総理大臣、現財務大臣兼副総理の麻生太郎さんも落ち着いて飲んでみえます。偏差値が 50 以上に伸びず、貯金が 6,000 万円以上貯まらない人は、平均点（凡才）で看護師、臨床検査技師、司法書士になるより、平均点（凡才）で弁護士になる道を見直されては如何でしょう。愛知医大や藤田保健衛生大学の医学部医学科進学については、そこ（6,000 万円、7,000 万円）まで予算がなく、入試ブローカーを使わず「つらい」とのことであれば、南山大学や愛知大学の法科大学院への進学がお勧めです。東海大学法科大学院は、2013 年弁護士国家試験の合格率が 0%となり閉校が決まりましたが、日本の有名 Talent、TV Drama で弁護士の役をされた恵俊彰さん（偏差値 50 未満の凡才）も、誰でも入れる私立大学と法科大学院で少々勉強されれば、「きっと本物の弁護士になれるでしょう」と、ある日本人小説家の人も太鼓判を押してみえます。法律行為全て出来る弁護士資格の国家試験は 400 万円で大丈夫。最後（最終学歴）は、あそこ（大学院）に入るのが一計です。

なぜ、（過去の）日本卓球協会公式ハンドブックの名簿に、Dr. 志田幸久の名前が載っていないのでしょうか？

全日本卓球チームの健康診断、Doping 指導、Sports 講義、国際試合関係会議出席等を、日本卓球協会からの依頼をもって行っていました。非常勤勤務であったため、日本卓球協会ハンドブックの名簿には全日本チームドクターとして公式ハンドブックには名前がありません。非常勤の「(元) 全日本卓球チームドクター」「(元) 日本代表者」です。なお、Dr. 志田の Sports 医学の Paper のうち、本 Homepage 提示の英文 Paper 以外の過去の三重大学病院（1988 年～1992 年）で記載された日本語 Paper は、三医会（三重大学医学部医学科同窓会）からの激しい Academic Harassment に遭い、残念ながら中途半端に終わっています。

なぜ、志田医師は、学会で研究発表し、Full-paper を書かれないのでしょうか？

日本で三重大学、京都大学、東京大学学閥の志田医師に対する Academic Harassment が終わり、志田医師の母校三重大学の教授 Post、研究費を確保出来れば、医学書を買ひ、学会に出席し、**Chairperson 20th Anniversary Treatise** の Full-paper を書けますが、それには志田医師の大学院同期生で低い人間性（B 評価）にも関わらず（一時的に）三重大学教授になった岩佐元雄医師と同じく、30 歳～60 歳の 30 年間で 5 億円程掛かります。三重大学、京都大学、東京大学の教授陣は、志田医師に一言の断りもお入れにならず、1 円もお支払いになってみえません。まず、「My Way」をご理解いただくことが肝要です。

なぜ日本の Mass Media は、志田医師について報道しないのでしょうか。

日本の Mass Media の最大学閥は 2～3 割が凡才の早稲田大学です。従いまして、秀才でない私立大学出身者、私立大学の方が、秀才の国公立大学出身者、国公立大学よりお好みで、秀才の三重大学医学博士は敬遠してみえるのかもしれませんが。一般的に、日本の私立大学は凡才が支配的な空気で、秀才が支配的な空気の三重大学など国公立大学に一目置いたりせず、頭のある国公立大学の医師を、頭のない私立大学の医師と区別し、先生、ドクターと呼ぶ、基本的な Business Manner も余り拝見しません。帝国 Hotel、六本木 Hills Club でも、大きな声を出され、ご自身の大学名も話されない Manner の良くない利用者は、慶應大学、杏林大学などの私立大学です。日本の小学校では、「廊下は静かに歩きましょう」「最初にクラスと名前を名乗り、先生には礼儀正しくしましょう」とポスターに書いてあります。

「志田先生は、今（21 世紀）は国立福島大学合格の秀才、国立三重大学出身ではなく、私立愛知医大、私立慈恵医大など、Wife、看護婦など下ネタが多い私立大学出身の凡才と一緒に」との評判を聞きますが、本当でしょうか？

確かに日本で国立秋田大学出身のある医師がその様な評価、言い方をしてみえる様ですが、「三重大学に入っていない」「三重大学に入っていない」との表現は間違いです。「志田先生は、今（21 世紀）も三重大学出身の秀才で、弘前大学など国立大学の医師とバランスが取れている」が正解です。[田口修 現三重大学教授は、看護婦の押し売りを受けることなく国立弘前大学出身の女医と再婚しています] 誹謗中傷にも当たり、評判も消えていませんため、秋田大学にはさらなる医学教育が必要です。

Yukihisa SHIDA, M.D., Ph.D.

Team Doctor of the Japan Table Tennis Team (1990-1994)

Chairperson of the International Table Tennis Federation Sports Science Congress (1991)
